FOREWORD

The ICS counts the 16 Research Groups which are described below. During its history, the ICS staff has received more than 150 invention certificates of the former USSR and 68 Ukrainian patents. There were published more than 1500 papers and 187 of them in 2020. There were defended 48 DSc and PhD theses.

A competence and expertise of ICS staff has been confirmed since 1997 by awarding 21 international grants and projects within the INTAS, CRDF, NSF, NATO, STCU, and FP7, DAAD, Erasmus+ of the European Union, in particular the one in 2020. In these projects, the ICS collaborated with a huge number of world-known universities as well as governmental institutions and private companies. We started to run a new Erasmus+ project WORK4CE: Cross-domain competences for healthy and safe work in the 21st century in 2020.

Additional 17 projects have been completed funded by the Ministry of Education and Science, Ukraine; in particular, the project "Methods and Means of Structural-Statistical Identification of Hierarchical Objects by Characteristic Points of Their Contours", project Leader, Dr Diana Zagorodnya has continued.

The ICS holds the IEEE International Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS) every two years since 2001. Proceedings of the conferences are indexed by WoS, EI Compendex and Scopus. Now we are preparing along with a Polish team from Cracov University ofTechnology the 11th IDAACS 2021, which will be held in September, 2021 in Cracov, Poland.

The ICS has been taking a part in organization of International Symposia on Wireless Systems within the IDAACS Conference since 2012. The 5th IEEE International Symposium on Wireless Systems within the IDAACS Conference (IDAACS-SWS'2020) was held 17-18 September, 2020 in Dortmund, Germany and ICS team was involved in its preparation.

The ICS staff has a good relationship with the IEEE Student Branch at TNEU and the Instrumentation and Measurement / Computational Intelligence Joint Societies Chapter of IEEE Ukraine Section. A Chapter has run the nine meetings in 2020.

The International Journal of Computing is issued quarterly in cooperation with the Glushkov Institute for Cybernetics, National Academy of Science, Ukraine. The Journal is indexed by Scopus Elsevier as well as Finnish publication forum, Norwegian Social Science Data Services, Google Scholar, and Index Copernicus. The four regular issues were published in 2020.

Finally, I would like to thank to Dr Pavlo Bykovyy, Dr. Taras Lendyuk and Dr. Oleksandr Osolinskyi for their help in preparing, editing and designing this report.

Enjoy,

March 12, 2021

Prof. Anatoliy Sachenko

1. GENERAL INFORMATION

ICS History

The mission of the Research Institute for Intelligent Computer Systems (ICS) is to develop the international research projects and improve project management in the field of Computing with the participation of inter-university teams.

The ICS counts the 16 Research Groups, in particular Intelligent Distributed Systems Group, Intelligent Sensor Data Acquisition Group, Intelligent Robotic Systems Group, Neural Networks and Parallel Computing Group, Knowledge Bases and Ontologies Group, Information Technology and Specialized Computer Systems Group, Image Processing and Pattern Recognition Group, Wireless Systems Security Group, Project and Program Management based on of Information Technologies and Knowledge Group, Cybernetics of Complex Systems Group, Information Security Group, Intelligent Cyber Security and Defense Group, Metrology of Information Measuring Systems Group, Design and Testing of FPGA Component for Safety Related Systems, Virtual Instruments for IoT, Big Data and Data Sciences, Human-Computer Interaction.

ICS Management

Director – Prof. Volodymyr Kochan
 Scientific Advisor – Prof. Anatoliy Sachenko
 Scientific Secretary – Dr. Myroslav Komar

ICS office address:
 Research Institute for Intelligent Computer Systems
 3 Peremogy Square
 Ternopil, 46020
 Ukraine
 Phone. +380 (352) 475050 ext. 12234
 Fax +380 (352) 475053 (24 hours)
 e-mail: ics@wunu.edu.ua
 web: <http://ics.wunu.edu.ua>

ICS Frame

Intelligent Distributed Systems Group (IDS)

Principal researcher – Prof. Anatoliy Sachenko
 Group members:

- Pavlo Bykovyy
- Volodymyr Kochan
- Myroslav Komar
- Olexandr Osolinskyi
- Vasyl Yatskiv

Intelligent Sensor Data Acquisition Group (ISDA)

Principal researcher – Prof. Volodymyr Kochan
 Group members:

- Pavlo Bykovyy
- Zbyshek Dombrovsky
- Orest Kochan
- Olexandr Osolinskyi

- Oleksiy Roshchupkin
- Radislav Smid
- Iryna Turchenko
- Radislav Smid
- Nadia Vasylykiv

Intelligent Robotic Systems Group (IRS)

Co-Researchers, Principal researchers – Prof. Robert Hiromoto, Dr. Vasyl Koval

Group members:

- Oleh Adamiv
- Vladimir Golovko
- Anatoliy Sachenko

Neural Networks and Parallel Computing Group (NNPC)

Co-Researchers, Principal researchers – Prof. Vladimir Golovko, Dr. Volodymyr Turchenko

Group members:

- Vitaliy Dorosh
- Volodymyr Kochan
- Anatoliy Sachenko
- Myroslav Komar
- Khrystyna Lipyanina-Goncharenko

Knowledge Bases and Ontologies Group (KBO)

Co-Researchers, Principal researchers – Prof. Uwe Grossmann, Prof. Sergey Rippa

Group members:

- Taras Lendyuk
- Andriy Melnyk
- Anatoliy Sachenko
- Serhiy Voznyak

Information Technology and Specialized Computer Systems Group (ITSCS)

Principal researcher – Prof. Yaroslav Nykolaychuk

Group members:

- Orest Volynskyy
- Arthur Voronych
- Natalia Vozna
- Oleg Zastavnyy

Image Processing and Pattern Recognition Group (IPPR)

Co-Researchers, Principal researchers – Prof. Viktor Krylov, Prof. Bohdan Rusyn

Group members:

- Pavlo Bykovyy
- Ivan Kit
- Anatoliy Sachenko
- Diana Zagorodnya
- Denys Zolotukhin

Wireless Systems Security Group (WSS)

Principal researcher – DSc Vasyl Yatskiv, Dr. Taras Maksymyuk

Group members:

- Robert Hiromoto
- Andrii Kaniovskiy

- Anatoliy Sachenko
- Jürgen Sieck
- Taras Tsavolyk
- Orest Volynskyy
- Natalia Yatskiv

Project and Program Management based on of Information Technologies and Knowledge Group (PPMITK)

Principal researcher – Prof. Sergey Bushuyev, Prof. Carsten Wolff

Group members:

- Mykhailo Dombrovsky
- Zbyshek Dombrovsky
- Oksana Dunets
- Grygoriy Gladiy
- Taras Lendyuk
- Sergey Rippa
- Anatoliy Sachenko
- Oleg Sachenko
- Iryna Turchenko
- Nadiia Vasylykiv

Cybernetics of Complex Systems Group (CCS)

Principal researcher – Dr. Roman Pasichnyk

Group members:

- Dmytro Bodnar
- Grygoriy Gladiy
- Igor Dobrotvor
- Andriy Melnyk
- Yuriy Pigovskyy

Information Security Group (IS)

Principal researcher – Prof. Mykola Karpinsky

Group members:

- Pavlo Bykovyy
- Lesya Dubchak
- Myroslav Komar

Intelligent Cyber Security and Defense Group (ICSD)

Co-Researchers, Principal researchers – Prof. George Markowsky, Prof. Oleg Savenko

Group members:

- Pavlo Bykovyy
- Vladimir Golovko
- Stepan Ivasiev
- Volodymyr Karpinskyy
- Myroslav Komar
- Sergiy Lysenko
- Vasyl Yatskiv

Metrology of Information Measuring Systems Group (MIMS)

Co-Researchers, Principal researchers – Prof. Roman Kochan

Group members:

- Andrii Karachka

- Volodymyr Kochan
- Olexandr Osolinskyi
- Hryhorii Sapozhnyk
- Nadiia Vasylykiv

Design and Testing of FPGA Component for Safety Related Systems (DTFPGA)

Co-Researchers, Principal researchers – Prof. Oleksander Drozd, Prof. Vladimir Opanasenko

Group members:

- Viktor Antoniuk
- Miroslav Drozd
- Oleksandr Martynyuk
- Kostiantyn Zashcholkin

Virtual Instruments for IoT (VIIoT)

Principal researcher – Dr. Orest Kochan

Group members:

- Pavlo Bykovyy
- Ivan Kit
- Volodymyr Kochan
- Oleksandr Osolinskyi

Big Data and Data Sciences (BDDS)

Co-Researchers, Principal researchers – Prof. Natalya Shakhovska, Prof. Vasyl Lytvyn

Group members:

- Volodymyr Kochan
- Myroslav Komar
- Anatoliy Sachenko
- Oleg Savenko

Human-Computer Interaction (HCI)

Principal researcher – Prof. Juergen Sieck

Group members:

- Pavlo Bykovyy
- Mykhailo Dombrovsky
- Ivan Kit
- Oleksandr Osolinskyi
- Anatoliy Sachenko
- Iryna Turchenko
- Natalia Yatskiv

2. ICS RESEARCH STAFF

Senior Staff

Oleh Adamiv

Specialist (2000), Information Systems in Management, Ternopil Academy of National Economy, Master of Economic Cybernetics (2001), Ternopil Academy of National Economy, Ph.D. student (2001), Computational Machines, Systems and Networks, Department for Information Computer Systems and Control, IEEE member (1998), IEEE Student Branch Chairman in TANE (1998), Lecturer (2002), Department for Information Computer Systems and Control, Ph.D. in Artificial Intelligence Systems and Tools (2007), IDAACS 2001-2009 Organizing Committee Member, IRS group.

<https://orcid.org/0000-0001-7827-9521>

e-mail: oad@tneu.edu.ua, o.adamiv@ieee.org

Research interests: robotics, artificial intelligence, navigation methods for mobile robots.

Viktor Antoniuk

Master - 8.05010201 Computer Systems and Networks, PhD - 05.13.05 Computer Systems and Components. Department of Intelligent Computer Systems and Networks, State University «Odesa polytechnics».

e-mail: viktor.v.antoniuk@gmail.com

Research interests: online testing and verification of digital components, FPGA-based systems.

Dmytro Bodnar

Specialist (1971), Mathematics, Ivan Franko Lviv State University, Doctor of Physics and Mathematics, Professor, Mathematical Analysis, Professor at Department of Economic Cybernetics and Informatics, Ternopil National Economic University, SACTPC Group Member (2014).

<https://orcid.org/0000-0002-5811-7493>

e-mail: d.bodnar@tneu.edu.ua

Research interests: analytical foundations of the theory of branched continued fractions and their usage.

Pavlo Bykovyy

Bachelor (2004), Computer Engineering, Ternopil Academy of National Economy, Specialist (2005), Computer Systems and Networks, Engineer (2005), Basics PC Construction Laboratory of Department for Information Computer Systems and Control, IEEE Member (2004), IEEE Student Branch Chairman in Ternopil State Economical University (2005), Ph.D. Student (2007), Ph.D. in Computer Systems and Components (2011), IDAACS 2003-2017 Organizing Committee Member, IDS Group Member (2004), IS Group Member (2012), ICSD Group Member (2014).

<https://orcid.org/0000-0002-5705-5702>

e-mail: pb@wunu.edu.ua

Sergey Bushuyev

Research interests: security systems, databases, software development.

Founder and president of the Ukrainian Project Management Association, Head of Project Management Department at Kyiv National University of Construction and Architecture. Member of the Board of Directors, a member of the Certification Department, First Assessor in seven countries, International Validator of Certification Programs at International Project Management Association (IPMA), Head of PPMITK Group (2014).

<https://orcid.org/0000-0002-7815-8129>

e-mail: sbushuyev@ukr.net

Research interests: project management.

Igor Dobrotvor

Specialist (1979), Mathematics and Physics, PhD Student (1979), PhD in Physics and Mathematics (1984), Associated Professor at Department of Intelligent Information Technologies (then International Information, then Economic Cybernetics and Informatics) (2003), Doctor of Technical Sciences (2014), Head of SACTPC Group (2014)

<https://orcid.org/0000-0003-2812-1229>

e-mail: idobr@yandex.ru

Research interests: methods and means of digital signal processing: digital filters; decision support systems; mathematical conflictology and pattern recognition

Mykhailo Dombrovsky

Specialist (1998), Finances and Credit, Ternopil Academy of National Economy, training management and information systems Consortium for improving business and management education in Ukraine (2000-2002), research fellow (part-time work) Scientific Research Department of Ternopil National Economic University (TNEU) (2009-2013), engineer of the first category in the University educational computer cybernetic laboratory TNEU (2015), part-time lecturer (2000-2012), Department of International Economics, PPMITK Group Member (2013).

<https://orcid.org/0000-0002-5582-5793>

e-mail: Mik2_wsf@gmx.com

Research interests: project management.

Zbyshek Dombrovskyy

Specialist (1969), Radiotechnics, Kyiv Polytechnic Institute, Master in Organization Management (2000), Senior Researcher at Research Department of Ternopil Finance-Economic Institute, TFEI (1974), Inventor of USSR (1977), Head of Research Laboratory "Informatics" at TFEI (1988), Senior Lecturer (1996), Management Department, PMS group (2007), Ph. D. in Computer Systems and Components (2008), ISDA Group Member (2012), PPMITK Group Member (2012).

<https://orcid.org/0000-0002-3904-1796>

e-mail: zbig@tanet.edu.te.ua

Research interests: methods and means of digital signals processing, digital filters, decision support systems, arithmetic units and real time special processors, distributed objects automated control systems.

Miroslav Drozd

Bachelor - 122 Computer Science, Master - 121 Software of automated systems, Candidate of Science - 05.13.05 Computer systems and components. Department of Information Systems, Odesa Polytechnic State University.

<https://orcid.org/0000-0003-0770-6295>

e-mail: myroslav.drozd@opu.ua

Research interests: problem of hidden faults and verification of digital components, FPGA-based systems.

Oleksandr Drozd

Specialist - 0608 Electronic computing machines, Candidate of Sciences, Doctor of Sciences - 05.13.05 Elements and devices of computing equipment and control systems. Department of Computer Intelligent Systems and Networks, Odesa Polytechnic State University.

<https://orcid.org/0000-0003-2191-6758>

e-mail: drozd@ukr.net

Research interests: methods of diagnosing digital computer devices and systems for processing approximate data

Lesya Dubchak

Specialist in Mathematics and Informatics, Ternopil V. Hnatiuk State Pedagogical University (2003), Junior Researcher at Department of Information Systems Security (2003), Master in Computer Systems and Network, Ternopil Academy of National Economy (2004), Ph.D. Student (2005), Lecturer at Computer Science Department (2005), Ph.D. (2013), Computer Systems and Components, IS Group Member (2012).

<https://orcid.org/0000-0003-3743-2432>

e-mail: dlo@wunu.edu.ua

Research interests: fuzzy logic systems, VHDL language.

Robert Hiromoto

Ph.D., University of Texas, Dallas, USA, Professor of Computer Science, University of Idaho, Idaho-Falls, USA, Fulbright Program Fellow (2013-2014), TNEU, Co-Head of IRS Group (2013), WSS Group Member (2013).

e-mail: hiromoto@uidaho.edu

Research interests: parallel computing, wireless sensors security, wireless networks

Grygoriy Hladiy

Specialist (1979), Applied Mathematics, Chernivtsi State University, Ph.D. (1990), Mathematical Methods, Models and Information Technologies in Economics, Associated Professor (2013), Department for Information Computer Systems and Control, CCS Group Member (2013), PPMITK Group Member (2014), SACTPC Group Member (2014).

<https://orcid.org/0000-0002-5585-8472>

e-mail: hladiy@yahoo.com

Research interests: flow methods of imitation simulation of economy systems and processes.

Vladimir Golovko

Master (1979), Computer Engineering, Moscow Bauman State Technical University, PhD (1990), in Computer Science (1990), Doctor of Technical Sciences (2003), Head of Intelligence Information Technologies Department and Laboratory of Artificial Neural Networks of the Brest State Technical University, IRS Group Member (2014), Co-head of ICSD Group.

<https://orcid.org/0000-0003-2615-289X>

e-mail: gva@bstu.by

Research interests: artificial intelligence; neural networks; information security, mobile robots

Uwe Grossmann

Diploma in mathematics and information technology, Bochum University, Germany, PhD in mathematics, Bochum University, Germany, research associate at Essen University and Max-Planck-Institute Dortmund, project manager computer aided manufacturing at MBP Software & Systems GmbH. Current position: professor of mathematics and business computing at University of Applied Sciences and Arts, Dortmund; speaker of research group 'mobile business – mobile systems.

e-mail: uwe.grossmann@fh-dortmund.de

Research interests: mobile business/commerce, location based services, mobile/wireless systems, localization/positioning.

Stepan Ivasiev

Master (2009), Automated Systems Software, Ternopil National Economic University, PhD (2016), Senior Lecturer (2017), Group ICSD (2017).

<https://orcid.org/0000-0003-2243-5956>

e-mail: isv@tneu.edu.ua

Research interests: number theory, programming.

Andriy Karachka

Specialist (1979), Electronic Computers, Lviv Polytechnical Institute, PhD (1995), Instruments and Methods for Measuring Electrical and Magnetic Quantities, Associated Professor at Department for Information Computer Systems and Control (2001), IEEE Member (2001), head of branch of Department for Information Computer Systems and Control at Drohobych Mechanical and Technological College (2011), Group MIMS (2017).

<https://orcid.org/0000-0001-5689-5905>

e-mail: aka@tneu.edu.ua

Research interests: computer architecture, computer circuitry, design of computer systems and networks.

Mykola Karpinskyy

Specialist (1980), Electrical Drive and Automation of Industrial Units, Ph.D. Student (1985), Ph.D., Lviv Polytechnical Institute (1989), D.Sc. in Devices and Means of Electrical and Magnetic Values Measuring (1995), Professor, Department of Information Systems Security (2001), Head of IS Group (2012).

<https://orcid.org/0000-0002-8846-332X>

e-mail: mkarpinski@ath.bielsko.pl

Research interests: specialized computer systems, wireless information technologies and systems of their security.

Volodymyr Karpinskyy

Master (1980), Computer Systems and Networks, Ph.D. Student (2008-2012), Ph.D. in Mathematical modelling and computational methods, Ivan Puluj National Technical University, Ternopil (2012), Ph.D. in Computer Science, West Pomeranian University of Technology, Szczecin, Poland (2013).

e-mail: vkarpinskyi@gmail.com

Research interests: mathematical modelling, metrology, computational methods, Computer Systems and Networks, Computer Science.

Orest Kochan

Specialist (2006), Physics of Metals, Lviv National University named after I. Franko, IDSCS group member (2007), training researcher (2008), Research Institute for Intelligent Computer Systems, Ph. D. Student (2008), Ph. D. in Devices and Methods of Heat Value Measuring (2011), Senior Lecturer, Department for Information Computer Systems and Control (2011), ISDA Group Member (2008), MIMS Group Member (2014).

<https://orcid.org/0000-0002-3164-3821>

e-mail: oko@tneu.edu.ua

Research interests: intelligent temperature measurement systems.

Roman Kochan

Specialist (1998), Informational Measurement Techniques, State University “Lviv Polytechnic”, Ph. D. student (2000), Computational Technique Elements and Devices and Control Systems, Ternopil Academy of National Economy, IEEE member (2001), Ph. D. in Technical Sciences (2005), D.Sc. in Technical Sciences (2013), Head of MIMS group (2014).

<https://orcid.org/0000-0003-1254-1982>

e-mail: roman.kochan@gmail.com

Research interests: distributed measurement systems, microprocessor systems, analog-digital converters.

Volodymyr Kochan

Specialist (1973), Informational Measurement Techniques, Lviv Polytechnic Institute, Ph. D. in Technical Sciences (1989), Devices and Methods for Measuring Thermal Values, Associate Professor of Department for Information Computer Systems and Control (1996), Associate Professor of Department of Specialized Computer Systems (2002), IEEE member (2002), Member of Specialized Academic Council K58.082.02 at TNEU (2002), Director of the Research Institute for Intelligent Computer Systems (2004), IDAACS 2001-2013 OrgCom Vice-Chair, IDS Group Member (2004), NMPC Group Member (2004), Head of ISDA Group (2009), MIMS Group member (2014).

<https://orcid.org/0000-0001-8376-4660>

e-mail: vk@wunu.edu.te.ua

Research interests: intelligent measurement devices, informational-measurement systems and complexes.

Myroslav Komar

Specialist (2001), Information Systems in Management, Ternopil Academy of National Economy, Master (2002), Economic Cybernetics, Ternopil Academy of National Economy, Programmer (2002), Laboratory of Computing Systems and Networks at Department for Information Computer Systems and Control, Ph.D. Student (2008), Information Technologies, Ph.D. (2013), Information Technologies, IDS Group (2008), IS Group Member (2012), ICSD Group Member (2014).

<https://orcid.org/0000-0001-6541-0359>

e-mail: mko@wunu.edu.ua

Research interests: artificial intelligence, systems of information security.

Vasyl Koval

Specialist (1998), Management Information Systems, Ternopil Academy of National Economy, M.S. in Economic Cybernetics (1999), Ternopil Academy of National Economy, Ph.D. Student (1999), Computing Machines, Systems and Networks, Lecturer (2001), Department for Information Computer Systems and Control, IEEE member (2000), IDAACS International Symposium Organizational Committee Member (2001-2005), Ph.D. in Artificial Intelligence Systems and Means (2004), Associate Professor of the Department for Information Computer Systems and Control (2007), Faculty of Computer Information Technologies, IDAACS 2005-2007 OrgCom Vice-Chair, Co-Head of the IRS group (2009),.

<https://orcid.org/0000-0003-4726-097X>

e-mail: vko@wunu.edu.ua

Research interests: mobile robots signal and image processing, technical vision systems, artificial intelligence, distributed systems.

Victor Krylov

Specialist in radiotechnics, Odessa Polytechnic Institute (1978), Ph.D. in Radiotechnical and Television System and Devices (1986), D.Sc. in Control Automate Systems and Advanced Information Technologies (2003), Professor, Department of Applied Mathematics and Information Technologies in Business (2005), Odessa National Polytechnic University, co-head of IPPR group (2012).

<https://orcid.org/0000-0003-1950-4690>

e-mail: viktor.kryilov@gmail.com

Research interests: digital images processing, images recognizing.

Taras Lendyuk

Specialist (1985), Industry Planning, Ternopil Finance Economic Institute, Engineer-Programmer (1986), Ph. D. student (1999), Economic-Mathematical Modelling, Department for Information Computer Systems and Control, IDAACS 2001-2011 organizing committee member, KBO Group Member (2009), PPMITK Group Member (2014).

<https://orcid.org/0000-0001-9484-8333>

e-mail: tl@wunu.edu.ua

Research interests: economic-mathematical ultisen, project management.

Khrystyna Lipyanina-Goncharenko

Bachelor (2011), Economic Cybernetics, Ternopil National Economic University, Master (2012), Economic Cybernetics, Ternopil National Economic University, Lecturer at Department for Information Computer Systems and Control (2019), PhD (2019), Senior Lecturer at Department for Information Computer Systems and Control (2020), SACTPC Group member (2019).

<https://orcid.org/0000-0002-2441-6292>

e-mail: xrustya.com@gmail.com

Research interests: economic-mathematical ultisen, project management.

Sergiy Lysenko

2005 – graduated from Khmelnytskyi National University with a degree in Computer Systems and Networks. 2011 – defended a candidate's thesis on the topic: "Adaptive information technology for diagnosing computer systems for the presence of Trojan programs" on 05.13.06 - "Information technologies". 2013 – obtained the academic title of associate professor of the Department of System Programming.

<https://orcid.org/0000-0001-7243-8747>

e-mail: sirogyk@ukr.net

Research interests: Malware detection methods; Methods of detecting cyber-attacks in corporate networks; Self-adaptive systems for detecting cyber threats in computer networks.

Vasyl Lytvyn

Doctor of Technical Sciences, professor, head of the Department of Information Systems and Networks, Institute of Computer Sciences and Information Technologies, Lviv Polytechnic National University.

<https://orcid.org/0000-0002-9676-0180>

e-mail: vasyl17.lytvyn@gmail.com

Research interests: development of intelligent decision-making support systems, introduction of metrics for determining evaluations of various properties of knowledge bases, construction of ontologies of subject areas.

Taras Maksymyuk

Candidate of Technical Sciences (2015), associate professor of the Department of Telecommunications, Institute of Telecommunications, Radio Electronics and Electronic Engineering, Lviv Polytechnic National University.

<https://orcid.org/0000-0002-2739-9862>

e-mail: taras.maksymyuk@gmail.com

Research interests: telecommunications; heterogeneous mobile communication networks.

George Markowsky

A Professor and Chair of Computer Science Missouri University of Science and Technology. George Markowsky has published 115 journal papers, book chapter, book reviews and conference papers on various aspects of Computer Science and Mathematics.

e-mail: markov@mst.edu

Research interests: from pure mathematics to the application of mathematics and computer science to biological problems. He has also built voice controlled and enhanced keyboard terminals for use by paralyzed individuals.

Oleksandr Martynyuk

Specialist - Electronic computers, electrical engineer, Candidate of Sciences - 05.13.06 Automated control systems and progressive information technologies. Associate Professor of the Department of Computer-Intelligent Systems and Networks, Odesa Polytechnic State University.

<https://orcid.org/0000-0003-1461-2000>

e-mail: martynyuk@opu.ua

Research interests: analysis of protocols and verification of computer networks, synthesis of tests for computer systems.

Andriy Melnyk

Bachelor (2005), Economic Cybernetics, Ternopil Academy of National Economy, Master in Economic Cybernetics (2006), Ternopil State Economic University, Ph.D. student (2007), Ph.D. in Information Technologies (2012), KBO Group Member (2005), CCS Group Member (2009).

<https://orcid.org/0000-0001-7799-9877>

e-mail: melnyk.andriy@gmail.com

Research interests: ontology, knowledge discovery.

Yaroslav Nykolaychuk

Specialist in Electrification and Automation of Oil and Gas Production (1967), Lviv Polytechnic Institute, Ph. D in Elements and Devices of Computer Engineering and Control Systems (1980), D. Sc. in Elements and Devices of Computer Engineering and Control Systems (1989), Prof. (1993), Department of Automated Control, Ivano-Frankivsk Institute of Oil and Gas, director of Carpathian State Center of Information Tools and Technologies of National Academy of Sciences of Ukraine (1994), full member of Ukrainian Academy of National Progress (1995), Head of Department of Specialized Computer Systems (1999), Vice-director on science of Institute of Computer Information Technologies (2000), IEEE member (2000), Vice-head of Special Scientific Council K58.082.02 at TNEU (2002), Head of ITSCS group (2007).

<https://orcid.org/0000-0002-2393-2332>

e-mail: yn@wunu.edu.ua

Research interests: embedded computer systems, signal processing, information theory and data encoding, autonomous sensors, low-level sensor networks.

Volodymyr Opanasenko

Professor, Doctor of Technical Sciences (Elements and devices of computer technology and control systems). Leading researcher, Department of Microprocessor Technology No. 205, Institute of Cybernetics named after V.M. Hlushkova National Academy of Sciences of Ukraine

<https://orcid.org/0000-0002-5175-9522>

e-mail: vlopanas@ukr.net

Research interests: microprocessors

Olexandr Osolinskyi

Bachelor (2004), Computer Engineering, Ternopil Academy of National Economy, Specialist (2005), Computer Systems and Networks, Ternopil Academy of National Economy, Junior Scientist (2005), Research Institute for Intelligent Computer Systems, Ph. D. in Computer Systems and Components (2016), IDAACS 2005-2009 organizing committee member, ISDA and IDS Groups Member (2004), MIMS Group Member (2014).

<https://orcid.org/0000-0002-0136-395X>

e-mail: oso@wunu.edu.ua

Research interests: software development, web-design, distributed systems, computer systems architectures.

Roman Pasichnyk

Specialist in Applied Mathematics (1979), Lviv State University named after I. Franko, Ph. D. in Physics and Mathematics (1989), Computational Mathematics, Assistant Prof. of Department of Economic Cybernetics, (1997), Vice-head of Department of Economic Cybernetic (2001), DsS. In Mathematical Modeling and Computing Tools (2016), Head of CCS Group (2009).

<https://orcid.org/0000-0003-3820-8854>

e-mail: rp@wunu.edu.ua

Research interests: ontologies, knowledge discovery.

Yuriy Pihovsky

Master in Economic Cybernetics (2004), Ternopil Academy of National Economy, lecturer (2004), Department for Information Computer Systems and Control, IDAACS 2003 international symposium organizational committee member, Ph. D. Student, Ph. D. in Mathematical Modelling and Calculus Methods (2008), CCS Group Member (2009).

e-mail: pigovsky@gmail.com

Research interests: mathematical modeling, algorithms.

Sergey Rippa

Specialist in Organizing Machine Processing of Economic Information (1979), Rostov-on-Don Institute of National Economy, Ph. D. in Economic-Mathematical Methods and Usage of Computer Engineering in National Economy Control (1985), D. Sc. in Economic-Mathematical Modelling (1998), Head of Department of Calculating-Information Technologies Development at Taxing Problems Research Center at Academy of Tax Service of Ukraine (1999), Prof. (1999), Department of Intelligent Information Technologies, Head of KBO Group (2008), PPMITK Group Member (2014).

<https://orcid.org/0000-0003-0429-6112>

e-mail: rippa_serg@ukr.net

Research interests: knowledge bases, ontology, knowledge discovering.

Oleksiy Roshchupkin

Specialist (2004), Computer Systems and Networks, Yuriy Fedkovych Chernivtsi National University, Assistant at Department of Computer Systems and Networks, Faculty of Computer Science, Yuriy Fedkovych Chernivtsi National University (2005), PhD Student at Ternopil National Economic University (2010), Computer Systems and Components, Head of IEEE student branch at TNEU, ISDA Group Member (2004).

Room 2009, phone 47-50-50

e-mail: o.roshchupkin@chnu.edu.ua

Research interests: information-measuring systems, microcontrollers, ultisensory systems, neural networks, sensors.

Bohdan Rusyn

Doctor of Technical Sciences (1998), professor, head of the department of methods and systems of image processing, analysis and identification of the Institute of Physics and Mechanics named after H. V. Karpenko of the National Academy of Sciences of Ukraine. Professor of the "Telecommunications" department of the Lviv Polytechnic National University.

<https://orcid.org/0000-0001-8654-2270>

e-mail: b.rusyn.prof@gmail.com

Research interests: pattern recognition systems with small databases; systems of synthesis, processing and recognition of complex structured images.

Grygoriy Sapozhnyk

Specialist (1979), Automation and Telemechanics, Lviv Polytechnic Institute, Head of Education Laboratories (1994), Lecturer (2000), PhD in historical sciences (2004), Department for Information Computer Systems and Control, Group MIMS.

Кімната 2017, тел.: 47-50-50, (12-312)

<https://orcid.org/0000-0001-8105-7401>

e-mail: grig_vik@yahoo.com

Research Interests: Labour protection.

Anatoliy Sachenko

Specialist in Information Measurement Technology (1968), Ph.D. in Electrical Engineering (1978), Scientific Advisor of Branch Research Laboratory for Automated Systems and Networks (1984), DSc in Computer Engineering (1988), Prof. of Department for Information Computer Systems and Control (1991), Honored Inventor of Ukraine (1992), Full Member of Ukrainian Academy of Economic Cybernetics (1998) and New-York Academy of Sciences (1998), Member of Specialized Scientific Council in State University “Lviv Polytechnic” (1994), Chairman of Specialized Scientific Council K58.082.02 at TNEU (2002), Editor-in-Chief of International Journal of Computing, Doctoral Dissertations Chapter Editor in “IEEE I&M Magazine”, Head of Department for Information Computer Systems and Control, Dean of Institute for Computer Information Technologies (1994-2005), Scientific Advisor of the ICS (2004), IDAACS 2001-2013 Co-Chairman, Head of IDS Group (2004), Co-Head of ICSD (2014), NNPC Group Member (2004), KBO, WSS Groups Member (2008), IPPR, PPMITK and SACTPC Groups Member (2014).

<https://orcid.org/0000-0002-0907-3682>

e-mail: as@wunu.edu.ua

Research interests: Artificial intelligent systems, distributed sensor networks, computational, intelligence, intelligent robotics systems, parallel computation systems, cybersecurity and safety systems, project management, wireless sensor networks.

Oleg Sachenko

Specialist (1992), International Economy, Ternopil Institute of National Economy, Lecturer, Department for Information Computer Systems and Control, TNEU (2013), Ph. D. in Projects and Programs Management (2016), PPMITK Group Member (2014).

<https://orcid.org/0000-0001-9337-8341>

e-mail: olsachenko231@gmail.com

Research interests: project management

Natalya Shakhovska

Doctor of technical sciences, professor, head of the department of artificial intelligence systems of the Institute of Computer Sciences and Information Technologies of the Lviv Polytechnic National University.

<https://orcid.org/0000-0002-6875-8534>

e-mail: natalya233@gmail.com

Research interests: spaces and data repositories; intelligent decision support systems; methods of data integration and aggregation; methods of eliminating uncertainties; design of distributed information systems.

Oleg Savenko

Specialist (1993), Mathematics, Kamyanets-Podilsky State Pedagogical Institute, PhD in Computer Systems and Components (1999), Dean of the Faculty of Programming and Computer and Telecommunication Systems, Khmelnytsky National University (2012), DSc. in Computer Systems and Components (2019), ICSD Group Member (2019).

e-mail: savenko_oleg_st@ukr.net

Research interests: Information security in computer systems and networks

Jürgen Sieck

Master in Mathematics (1981), Humboldt University Berlin, Germany, PhD in Computer Science (1989), Humboldt University Berlin, Germany. Senior researcher at the research group “Informations- und Kommunikationsanwendungen” (INKA), professor for computer sciences with a ultisensoryn on algorithms, multimedia and mobile application for the degree programme Applied Computer Science at the University of Applied Sciences HTW Berlin. WSS Group member.

e-mail: j.sieck@htw-berlin.de

Research Interests: multimedia, computer graphics, virtual reality and wireless communication.

Radislav Smid

Ph.D. (2000), Czech Technical university in Prague, Faculty of Electrical Engineering, Head of Laboratory of Diagnostics and Non-destructive Testing, Associate Professor at Department of Measurement, Faculty of Electrical Engineering, Czech Technical university in Prague, Prague, CzechRepublic. Dr Smid is a member of IMEKO and IEEE. ISDA Group member.

<https://orcid.org/0000-0003-4314-8841>

e-mail: smid@fel.cvut.cz

Research Interests: signal processing, measuring, testing, autonomous sensors embedded computer systems.

Taras Tsavolyk

Bachelor (2013), Computer Engineering, Master (2014), Specialized Computer Systems, Ternopil National Economic University, PhD Student (2014), Lecturer (2016), Department for Information Computer Systems and Control.

<https://orcid.org/0000-0002-1136-5705>

e-mail: tth@wunu.edu.ua

Research interests: wireless sensor networks, the system of residual classes.

Iryna Turchenko

Specialist (1997), Information Systems in Management, Ternopil Academy of National Economy, training lecturer (2002), Department of Specialized Computer Systems, Ph. D. Student (2003), Information Technologies, Lecturer (2006), Department for Information Computer Systems and Control, Ph. D. (2008), Computer Systems and Components, Assistant Professor of Department for Information Computer Systems and Control (2011), ISDA Group Member (2004).

<https://orcid.org/0000-0002-9441-6669>

e-mail: itu@wunu.edu.ua

Research interests: neural networks, intelligent and distributed sensor networks, multi-parameter sensors.

Volodymyr Turchenko

Specialist (1995), Computing Machines, Systems, Complexes and Networks, Brest Polytechnic Institute (rep. Belarus), Ph. D. in Computer Engineering (2001), Assistant Professor (2002), Associate Professor (2004), Department for Information Computer Systems and Control, IEEE member (1999), IDAACS 2001-2011 OrgCom Vice-Chair and member, member of Specialized Academic Council K58.082.02 at TNEU (2002-2009), FP7 Marie Curie Postdoctoral Research Fellow at the Center of Excellence of High Performance Computing, Department of Electronics, Informatics and Systems, University of Calabria, Italy (2009-2011), Deputy editor-in-chief of International Journal "Computing" (2009), ACM member (2009-2011), Member of Marie-Curie Association, Head of NNPC Group (2004).

<https://orcid.org/0000-0003-3810-6970>

e-mail: vtu@wunu.edu.ua, web: <http://www.ics.wunu.edu.ua/vtu/>

Research interests: Neural networks, parallel programming, parallel and distributed computations.

Nadiia Vasylykiv

Specialist (1981), Physics, Lviv State University, Senior Lecturer (1995), Department for Information Computer Systems and Control, Ph. D. in Devices and Methods of Heat Value Measuring (2011), Assistant Professor of Department for Information Computer Systems and Control (2011), ISDA group member (2012), MIMS groups member (2014).

<https://orcid.org/0000-0002-4247-7523>

e-mail: nv@wunu.edu.ua

Research interests: metrological support for information measurement systems.

Orest Volynskyy

Master (2009), Specialized Computer Systems, Ternopil National Economic University, Training-Researcher RIICS (2009), Ph. D. (2013), ITSCS group member (2009), WSS group member (2014).

<https://orcid.org/0000-0002-1409-9393>

e-mail: ovo@tneu.edu.ua

Research interests: special processors in bounded systems of residual classes.

Artur Voronych

Master (2008), Automation Control of Technological Processes, Ph.D. student (2010), Department of Computer Systems and Network, Ivano-Frankivsk National Technical University of Oil and Gas, ITSCS group (2012).

<https://orcid.org/0000-0003-0701-917X>

e-mail: archy.bear@gmail.com

Research interests: signal processing, theory of information and data encryption.

Natalia Vozna

Specialist (1998), Management Information Systems, Ternopil Academy of National Economy, PhD student (2005), Computers, Systems and Networks, lecturer (2009), Department of Specialized Computer Systems, PhD (2009), Computer Systems and Components, ITSCS group (2013).

<https://orcid.org/0000-0002-8856-1720>

e-mail: nvozna@ukr.net

Research interests: computer systems design, information theory and data decoding, lower computer networks.

Carsten Wolff

A full professor for computer science at Dortmund University of Applied Sciences and Arts since 2007. He studied electrical engineering and economics at Paderborn University and did a PhD in electrical engineering at the Heinz Nixdorf Institute. In his industrial career, Dr. Wolff was in the semiconductor industry (Infineon AG). He is a founding member of the research centre PIMES (www.pimes.de).

<https://orcid.org/0000-0003-3646-5240>

e-mail: carsten.wolff@fh-dortmund.de

Research interests: development of methodology and tools for embedded systems, processing technologies and transmission projects in the field of mechatronic systems, mobile communication and renewable energy sources.

Natalia Yatskiv

Specialist (1997), Physics-Engineer, Ivano-Frankivsk Oil and Gas State Technical University, Ph. D. in Technical Sciences, Computational Machines, Systems and Networks (2003), Associate Professor (2007), Department for Information Computer Systems and Control, WSS Group Member (2012).

<https://orcid.org/0000-0003-2421-4217>

e-mail: jatskiv@ukr.net

Research interests: human-computer ultisensor; wireless communication technologies.

Vasyl Yatskiv

Specialist (1996), Automation Technological Processes and Manufacturing, Ivano-Frankivsk Oil and Gas State Technical University, Ph. D. in Technical Sciences, Computational Machines, Systems and Networks (2001), Senior Lecturer (2001), Associate Professor (2002), Department of Specialized Computer Systems, DsS in Computer Systems and Components (2016), Secretary of the Specialized Academic Council K58.082.02 at TNEU (2002), IDS Group Member (2004), Head of WSS Group (2012),.

<https://orcid.org/0000-0001-9778-6625>

e-mail: jazkiv@ukr.net, vy@wunu.edu.ua

Research interests: cordless optical connection channels, modular arithmetic based special processors development.

Diana Zahorodnia

Bachelor (2008), Pedagogic Education, Teacher of Mathematics and Basics of Informatics, V. Hnatiuk Ternopil National Pedagogic University, Master (2009), Pedagogic Education, Teacher of Mathematics and Basics of Informatics, V. Hnatiuk Ternopil National Pedagogic University, Head of Training Courses (2009), Ternopil Municipal “Station of Junior Technics”, Administrative Assistant, Ph.D. student (2012), Department for Information Computer Systems and Control, Ternopil National Economic University (2012), IPPR Group Member (2012), SACTPC Group Member (2014).

<https://orcid.org/0000-0002-9764-3672>

e-mail: dza@wunu.edu.ua

Research interests: image identification, image analysis algorithms for computer recognition systems.

Oleh Zastavny

Specialist (2002), Information Security in Computer Systems, Ternopil Academy of National Economy, Ph. D. student (2002), Elements and Devices of Computer Engineering and Control Systems, Assistant (2002), Department of Specialized Computer Systems, Ph. D. (2007), Elements and Devices of Computer Engineering and Control Systems, ITSCS group (2007).

e-mail: oz@tanet.edu.te.ua

Research interests: embedded computer systems, signal processing, information theory and data encoding, autonomous sensors, low-level sensor networks.

Kostyntyn Zashcholkin

Candidate of Sciences, Associate Professor of the Department of Computer-Intelligent Systems and Networks, Odesa Polytechnic State University.

<https://orcid.org/0000-0003-0427-9005>

e-mail: const-z@te.net.ua

Research interests: FPGA-based systems, digital watermarks, digital steganography.

Junior Staff

Vitaliy Dorosh

Bachelor (2009), Software of Automated Systems, Ternopil National Economic University, Engineer (2009), ISDA Group Member (2009), Laboratory of Personal Computers at Department for Information Computer Systems and Control, NNPC Group Member (2013).

<https://orcid.org/0000-0002-0199-0478>

e-mail: vdo@wunu.edu.ua

Research interests: neural networks

Oksana Dunets

Bachelor (2015), Information Technologies, Computer Science, Ternopil National Economic University, is pursuing Master degree in Project Management (2017), technician at Department for Information Computer Systems and Control (2015), PPMITK Group Member (2015).

e-mail: o.dunets@tneu.edu.ua

Research interests: neural networks, web development, project management, artificial intelligence, modeling, web technologies.

Andriy Kaniovskyy

Bachelor (2017), Computer Science, Ternopil National Economic University, magistr (2018), Master at Department for Information Computer Systems and Control, WSS Group member (2018).

e-mail: andriy.kanovskyy@gmail.com

Research interests: Electronics, Mechanics, 3D Modeling.

Ivan Kit

Bachelor (2018), Computer Science, Ternopil National Economic University, magistr (2020), Personal Computer Lab Technician (2305), IPPR Group Member (2018).

<https://orcid.org/0000-0002-4526-0020>

e-mail: kitivan400@gmail.com

Research interests: image identification, image analysis algorithms for computer recognition systems, neural networks.

Serhiy Voznyak

Engineer-Economist (1996), Information Systems in Management, Ternopil National Economic University Director Deputy of Exploitation and Security (1997), Lecturer, Department of Computer Engineering (1997), KBO Group Member (2012).

e-mail: sv@tneu.edu.ua

Research interests: computer networks and infrastructure, web-technologies

Denys Zolotukhin

Bachelor (2017), Computer Science, Ternopil National University of Economics, Master's (2018), Postgraduate Student, Department of Information Computing Systems and Management, IPPR Group Member (2018).

Room: 2007, phone: 47-50-50*12-324

e-mail: grakinoua@gmail.com

Research interests: Computer Graphics, 3D Modeling, VFX.

3. RESEARCH PROJECTS

Current

[Project 1] “Virtual Master Cooperation Data Science” (ViMaCs)

Grant holder – Dortmund University of Applied Sciences (FH Dortmund)

Managers: prof. Dr. Carsten Wolf, Prof. Stefan Recker (FH Dortmund)

Partner universities:

- Kyiv National University of Construction and Architecture (KNUBA) - prof. Sergey Bushuyev.
- Ternopil National University of Economics (TNEU) - prof. Anatoly Sachenko
- National University "Zaporizka Polytechnic" (NUZP) - prof. Galina Tabunshchik

Duration: 2019 – 2021.

The goal: to build a virtual training and laboratory infrastructure for online teaching and a portfolio of modules in the field of "Data Science".

Task:

1. Building a common IT environment, including a common e-learning platform
2. Development of 4 online educational modules for 6 ECTS:
 - KNUBA "Business analysis and decision-making"
 - TNEU "Data Collection and Processing"
 - NUSP "Artificial Intelligence and Data Analysis"
 - FH Dortmund "Cloud data processing systems"
3. Pilot training in specialized schools 4 times a year
4. Pilot training of teachers for interuniversity distribution of modules
5. Creating a community of practice for continuous content evolution

TNEU team:

- Anatoliy Sachenko;
- Pavlo Bykovyy;
- Oleksandr Osolinskyi;
- Mykhailo Dombrovskiy;
- Iryna Turchenko.

Link tom project web-site: <https://go-study-europe.de/vimacs/>

[Project 2] DAAD program “International Study and Training Partnerships” (ISAP)

Grant holder: Berlin University of Applied Sciences (HTW Berlin), prof. Juergen Sieck.

The head of the program from TNEU is Doctor of Technical Sciences, Prof. Anatoliy Sachenko

Duration: 2019 - 2021.

Goal: strengthening partnership relations and cooperation between German universities and universities in the countries of the Middle East / Southeast and Eastern Europe, as well as in the Caucasus and Central Asia; promoting cooperation for the reconciliation of academic degrees (Bologna Process)

Main tasks:

- strengthening existing and starting new stable partnerships;
- exchange of scientists, graduates and students;
- structural improvement of research and training conditions in partner countries;
- internationalization of German and foreign universities.

TNEU team:

- Anatoliy Sachenko;
- Pavlo Bykoviy;
- Iryna Turchenko.

[Project 3] WORK4CE: Cross-domain competences for healthy and safe work in the 21st century

Grant holder: Zaporizhia Polytechnic National University

Participants from Ukraine:

- Zaporizhia Polytechnic National University
- Kyiv National University of Construction and Architecture
- Ternopil National University of Economics

Foreign partners:

- Fachhochschule Dortmund
- Katholieke Universiteit Leuven
- Universidad del Pais Vasco/ Euskal Herriko Unibertsitatea
- Azərbaycan Respublikası Dövlətqomruk Komitəsinin Akademiyası
- Azərbaycan Dövlət Neft və Sənaye Universiteti
- Azerbaijan Architecture and Construction University

Duration: 2020 – 2023 pp.

Goals and content of the project:

Development of a new form of cooperation between universities and enterprises in the era of digital technologies to improve the employability of graduates; providing the latest competencies related to the competencies required for employment to shape the workplace of the future (Competence Model for Work 4.0 and Digital Transformation Maturity Model); promotion of international and interdisciplinary development of the educational content of the competence model for work 4.0.

Tneu Team:

- Pavlo Bykovyy;
- Nadiia Vasylykiv;
- Grygoriy Hladiy;
- Zbyshek Dombrovskiy;
- Mykhailo Dombrovskiy;
- Diana Zahorodnia;
- Andriy Karachka;
- Myroslav Komar;
- Volodymyr Kochan;
- Vasyl Koval;
- Ivan Kit;
- Taras Lendyuk;
- Khrystyna Lipianina-Honcharenko;
- Oleksandr Osolinskyi;
- Anatoliy Sachenko;
- Oleg Sachenko;
- Iryna Turchenko.

Link to project web-site: <https://work4ce.eu/>

[Project 4] Methods and means of structural-statistical identification of hierarchical objects by characteristic points of their contours

Principal investigator of project – PhD Diana Zahorodnia;
Co-investigator – PhD Hrystyna Lipyanina-Goncharenko.

Duration: 2019 –2020

Objectives: development of methods and tools aimed at improving the efficiency of automated video surveillance systems by reducing the amount of data processed.

Main results of the project:

- An analysis of known methods of identification and classification of objects for video surveillance systems.
- A method of combined adaptive identification of objects based on a hierarchical principle has been developed.
- A method of data classification based on cluster analysis methods has been developed.
- Algorithmic solutions of the proposed method of combined adaptive identification of objects based on the hierarchical principle are developed.
- Algorithmic solutions of the proposed method of data classification based on cluster analysis methods are developed.
- Experimental researches of the offered methods and algorithms are carried out.

Team:

- Diana Zahorodnia;
- Vitaliy Dorosh;
- Hrystyna Lipyanina-Goncharenko;
- Ivan Kit;
- Andriy Kaniovskyi;
- Denys Zolotukhin;
- Andriy Sydor;
- Dmytro Lendiuk.

Completed projects

[Project 5] Methods for intelligent processing and analysis of Big Data based on deep neural networks

Principal investigator of project – Prof. Anatoliy Sachenko;
Co-investigator – Dr Myroslav Komar.

Duration: 2018 –2019

Objectives: to increase the efficiency and performance of Big Data intelligent processing and analysis by developing effective methods of data compression and classification, and pattern recognition using deep neural networks.

Main results of the project:

- Known methods of data protection against computer attacks were analyzed.
- Data compression method based on deep neural networks was developed, using network traffic parameters in an intrusion detection system.
- A method for data classification based on deep neural networks was developed in order to prevent attacks against information telecommunication networks.
- An image recognition method was developed based on knowledge of Big Data using deep neural networks.
- A method for parallel deep neural network training was developed to solve the problems of Big Data compression and classification.
- Algorithms of the proposed methods of intelligent processing and analysis of Big Data based on deep neural networks were proposed.
- Deep neural networks architecture was proposed to solve the problems of Big Data compression and classification.
- Experimental studies of the proposed methods and algorithms have been carried out

Team:

- Anatoliy Sachenko;
- Myroslav Komar;
- Volodymyr Kochan;
- Vasyl Koval;
- Vladimir Golovko;
- Vasyl Yatskiv;
- Nadiia Vasykiv;
- Taras Lendyuk;
- Pavlo Bykovyy;
- Diana Zahorodnia;
- Vitaliy Dorosh;
- Oleksandr Osolinskyy;
- Grygoriy Gladiy;
- Oleksiy Roshchupkin;
- Volodymyr Turchenko

[Project 6] Erasmus+ALIOT

Grantholder – Prof. Chris Phillips, Newcastle University, Newcastle, UK

National coordinator – Prof. Vyacheslav Kharchenko, National Aerospace University KhAI, Kharkiv

Leader of ICS TNEU team – Prof. Anatoliy Sachenko, ICS, Ternopil National Economic University

Duration: 2016 – 2020

Objectives: to develop and update curricula for masters, graduate students and industrial company specialists in the field of development, research and application of Internet of Things (IoT) in accordance with the needs of modern society.

Interim project results:

- Three working meetings of all project participants were held in Chernivtsi, February, 2018; Kyiv, May, 2018, and Newcastle and Leeds, UK, July, 2018 to announce the interim results of the team and the tasks for a given period.
- Curricula were developed.
- The content of the developed courses and modules was discussed. The structure of books and manuals was developed and discussed according to the proposed courses and modules.
- Regular working meetings of the ICT-TNEU team were held (see information on the websites <http://www.tneu.edu.ua/>, www.iosu.tneu.edu.ua ra www.ics.tneu.edu)

Team:

- Anatoliy Sachenko;
- Myroslav Komar;
- Volodymyr Kochan;
- Vasyl Yatskiv;
- Vasyl Koval;
- Grygoriy Gladiy;
- Iryna Strubyt'ska;
- Zbyshek Dombrovskiy;
- Mykhailo Dombrovskiy
- Oksana Dunets;
- Pavlo Bykovyy;
- Diana Zahorodnia;
- Oleksandr Osolonskyy;
- Vitaliy Dorosh

[Project 7] DAAD programme “Eastern Partnerships”

Project Co-investigator: Prof. Anatoliy Sachenko

Co-investigator – Dr Iryna Turchenko

Duration: 2017 – 2019

Objectives:

- Strengthening partnerships and cooperation between German HEI and HEI in the Middle East/ South Eastern and Eastern Europe as well as Caucasus and Central Asia
- Fostering cooperation for alignment of academic degrees (Bologna process)

Main project results:

- Strengthening of existing and initiating new sustainable partnerships
- Research, graduate and student exchanges
- Sustainable structural improvement of conditions for conducting research and studying in partner-countries
- Contribution to internationalisation of German and foreign HEI

Team:

- Anatoliy Sachenko;
- Pavlo Bykovyy;
- Iryna Turchenko.

[Project 8] Theoretical Foundations and Hardware for Improving the Productivity of Wireless Sensor Networks

Principal investigator of project – Dr. Vasyl Yatskiv

Duration: 2017 – 2018

Objectives: The project is aimed at solving the scientific and applied problem of improving the productivity of Wireless Sensor Networks (WSN) by developing effective methods of noise-immune encoding and adaptive data transmission schemes, providing error-immune and asymmetric computing complexity methods of data compression. At the same time, important criteria for evaluating the developed methods are the following ones: hardware complexity, computational complexity and energy costs for the implementation of algorithms.

Main project results:

- development of methods for correction of multiple errors based on modular correction codes with low computational complexity of the decoding algorithms;
- study of computational complexity of the correction codes of the Residue Number System with a special system of modules;
- development of the method of data transmission in WSN on the basis of adaptive error control scheme and modular correction codes;
- investigation of the influence of noise on algorithms of data compression in WSN;
- development of new data compression methods resistant to noise and error propagation during decoding with asymmetric computational complexity of coding algorithms (the complexity of coding algorithms is less than the complexity of decoding algorithms);
- conducting experimental research of the transmission of compressed data under the influence of various types of noise;
- development and implementation on the FPGA of the reconfigurable special processor of noise-immune data encoding on the basis of modular correction codes;
- writing data compression algorithms in Verilog language and implementation of data processing devices in WSN on FPGA.

Team:

- Vasyl Yatskiv;
- Anatoliy Sachenko;
- Volodymyr Kochan;
- Mykhailo Kasyanchuk;
- Natalia Yatskiv;
- Ihor Yakymenko;
- Stepan Ivasiev;
- Orest Volynskyy;
- Taras Tsavolyk.

[Project 9] Methods of Protection against Computer Attacks based on Neural Networks and Artificial Immune Systems

Principal investigator of project – Prof. Anatoliy Sachenko;

Co-investigator – Dr Myroslav Komar.

Duration: 2016 – 2017

Objectives: The development of a new intelligent information technology based on the theory of artificial neural networks, fuzzy logic and artificial immune systems to increase the reliability of computer attacks detection and classification.

Main project results:

- An analysis of known methods of protection against computer attacks was carried out.
- A modified method for constructing a detector of computer attacks based on neural networks and artificial immune systems was developed.
- A method for reducing the amount of information based on neural networks of high trust with the use of multichannel neural network detectors for constructing a hierarchical classifier of computer attacks was developed.
- A generalized architecture of intelligent computer-based system to prevent computer attacks was developed.
- Experimental studies of developed methods and algorithms were conducted, which confirmed the reliability of detection and classification of computer attacks and improvement of the safety level.
- An approach was proposed to improve the security of the system designed to prevent computer attacks by implementing neural network detectors on FPGA and introducing a subsystem of decision-making based on the rules of the Mamdani fuzzy inference.

Team:

[Project 10] Distributed Sensor Networks with Computing Nodes Reconfiguration

Principal investigator: Prof. Anatoliy Sachenko

Co-investigator: Dr. Igor Maykiv

Foreign partner: Technical University of Moldova, Moldova

Duration: 2014 – 2015

Objectives: Development of methods for structural synthesis of universal modules with the reconfiguration possibility.

Main project results:

- Method for structural synthesis of universal modules comprising functional analysis, structural synthesis and the search for a set of optimal solutions was developed on the basis of morphological analysis and synthesis. The proposed method combines lexicographical criterion advantages (L-criterion) for the selection of electronic components during functional analysis and absolute criterion of preference (optimality Pareto, π -criterion) during the search for a set of optimal solutions that are considered in scientific literature as alternative methods for finding optimal solutions. The combination of L- and π -criteria allows us to reduce the number of alternatives synthesized during structural synthesis. A formalized discrete optimization solution is versatile for a wide range of problems of optimal structural synthesis of computing systems.
- A new universal module structure with improved functional properties was designed due to separate data processing and sharing as well as reconfiguration of hardware and software using Field Programmable Gate Arrays (FPGAs).
- A 4-level model that graphically shows information relationships between different processes of receiving and transmitting messages in the controller serial interfaces, which is an effective tool of their implementation both during functional analysis and structural synthesis, was developed.
- An experimental model of network application processor with the capability of reconfiguring was created and the methodology of its testing was developed.

[Project 11] Wireless Multimedia Sensor Networks on the Base of Modular Arithmetics and Galois Codes for Videomonitoring Systems

Principal investigator: Prof. Anatoliy Sachenko

Co-investigator: Dr. Vasyl Yatskiv

Foreign partner: Pedagogical University Huazhong, China.

Duration: 2013 – 2014

Objectives: developing of improved methods for training artificial neural networks on heterogeneous parallel computing systems referring to Grid, which provide high efficiency of parallelization and development of grid-based library functions for parallel training of artificial neural networks.

Main project results:

- New methods of data coding and transmitting based on modular arithmetic were developed, which enable increased efficiency of wireless multimedia sensor networks (WMSN). Methods were designed for devices with limited hardware resources and autonomous power supply.
- Method of network coding is based on data of Residue Number System. The overall bandwidth of wireless sensor networks was investigated as well as the scope of data transmission schemes for different residues.
- Method of coding and redundancy reducing of multimedia data without the loss in Residue Number System, which allows us to reduce image processing in 2-3 times by splitting the image into the modules of Residue Number System and parallel encoding of the obtained residues, was developed. Application of Huffman codes for residues compressing provides lossless compression ratio depending on the class of images: 1,6 – 4 – for photo-realistic images; 4 – 8 – for images with large areas of the same color.
- Method of improving data reliability based on modified correcting code of Residue Number System, which is characterized by a lower computational complexity and allows us to increase the efficiency of encoding about 5 times comparing with R – source code RNS and Reed – Solomon RS (127, 87), was developed.

[Project 12] Neural network method for improving the accuracy of information-measurement systems of ultraviolet radiation

Principal investigator: Prof. Anatoliy Sachenko

Project was completed within inter-university network Erasmus Mundus together with partners from Alaxender Ioan Kuza University, Iassi, Romania.

Duration: 2013 – 2014

Objectives: development of new neural network method for improving the accuracy of information measuring systems for measurement of ultraviolet radiation.

Research methods: structural and functional analysis (error analysis in measuring systems for measuring UV radiation level and UV sensors); methods of neural networks theory, the method of gradient ascent in the space of weight coefficients and neurons thresholds (for NN training); simulation methods (for experimental research of developed methods); technique for primary transformer investigation.

Project results:

- The methods of signal processing of multiparameter sensors were proposed. Simulations were conducted in MathLab.
- The software for modeling of the real multiparameter sensors behavior was developed. The software allows us to enter the model random and systematic errors and identify the limits of the proposed methods.
- Ukrainian Patent application for invention and useful model was received.

Team:

- Anatoliy Sachenko
- Oleksiy Roshchupkin

[Project 13] Methods and Tools of Building Wireless Multimedia Sensor Networks Based on Modular Arithmetic

Principal investigator – Prof. Yaroslav Nykolaychuk

Duration: 01.01.2013 – 31.12.2014

Objectives: development of methods and tools for data encoding and transmitting in wireless multimedia sensor networks aimed at improving the reliability of their operation and functionality.

Abstract: New methods and algorithms for data encoding and transmitting using mathematical tools of modular arithmetic were developed, aimed at improving the performance of wireless multimedia sensor networks (WMSM). A Verilog – encoder model for noise-immune data encryption using modified correcting codes was designed.

Main results:

- The method of adaptive coding and transmission of multimedia data based on modular arithmetic and multipath routing using adaptive distribution packages and their transfer from multipath routing, is developed, which provides the efficiency of the total bandwidth of wireless sensor networks.
- The method of network data coding based on the Residue Number System (RNS), which provides reduction of data amount by 50%, including the retransmission of packages that are necessary for message recovery, was developed. The proposed method allows us to select relatively simple modules of various bit-widths, though the bit-width of residues transmitted through the common route is approximately equal to the bit-width of residues on specific routes. The developed method of network coding improves overall network bandwidth by about 60%.
- A modified correcting code of Residue Number System was developed, which is characterized by the simplified procedure of check symbols formation, providing increased efficiency of encoding approximately in 5 times as compared with other correcting codes. Using modified correcting codes of RNS in wireless sensor networks allows us to improve the reliability and overall network bandwidth by reducing the number of retransmissions.

[Project 14] Efficient Parallel Batch and Single Pattern Neural Network Training Algorithms Using Open MPI and GPU-computing

Principal investigator: Dr. Volodymyr Turchenko

Partners: Prof. Jack Dongarra, Innovative Computing Lab, University of Tennessee, Knoxville, TN, USA.

Grant: Fulbright Scholar Program 2012/13

Duration: 09/2012 – 06/2013

Objectives: test enhanced batch pattern parallel algorithm for NN training by changing the parameters of the internal algorithms of MPI collective functions on different parallel architectures; develop GPU-based versions of the parallel batch and single pattern algorithms for NN training; test experimentally the efficiency of the improved GPU-based version of the algorithms in comparison with their Open MPI implementations.

Main results:

1. The parallelization efficiency of the neural network training algorithm on the example of the recirculation neural network model has been researched. The Open MPI, OpenMP and CUDA-based versions of the parallel batch pattern training algorithm for recirculation of neural network were implemented using C language. The parallelization efficiency of the developed algorithms has been researched on many-core parallel machine with 48 AMD Opteron 6180 SE processors, on computational cluster with 48 Intel Xeon E5520 processors, on 60-core Intel GPU Xeon Phi Coprocessor 5110P card and Nvidia Tesla C2050 GPU card using its 64 cores only (total is 1024). The experimental research of the developed algorithm using Open MPI technology showed the parallelization efficiency of 75% on 48 processors of the many-core system, 60% on 48 processors of the cluster, 70% on 60 processors of the Intel GPU Xeon Phi card. The experimental research of the developed algorithm using OpenMP technology showed lower figures, 40% of parallelization efficiency on 48 processors of the many-core system. The experimental research of the developed algorithm using CUDA technology showed 14-times speedup on one Nvidia Tesla GPU card. The developed algorithms are included to the developing library PaGaLiNNeT capable to speed-up scientific computations based on neural networks on general-purpose and hybrid (CPU+GPU) high performance computing systems.
2. The research project entitled “An Adaptive End-to-End Approach for Terabit Data Movement Optimization” was investigated. The goal of this project is to develop a novel architecture and related approaches to the end-to-end optimization of terabyte size data movement on next-generation networking and storage system technologies. The moving scientific data sets at terabits per second transfer rates over wide-area networks between geographically dispersed data centers were modeled. The set of events which describe a drop of the bandwidth in the communication network was obtained. A predictive model based on artificial neural networks to predict the duration of the event and the value of the maximum bandwidth drop was developed. I have used the developed library for parallel neural network training PaGaLiNNeT (developed by me within my previous project) and the model of a multi-layer perceptron. The experimental researches showed that the modeled events have stochastic nature and therefore it is necessary to tune the neural network model to provide desirable prediction results. This scientific collaboration with the host institution will be continued in the future.

[Project 15] Neural Network Methods for Evaluation of Microprocessor Power Consumption While Performing Instructions

Principal investigator: Dr. Zbyshek Dombrovsky

Duration: 2010 – 2012

Objectives: development of hardware-software complex, which allows to built mathematical models of processor cores power consumption.

Main tasks:

- development of appropriate specialized hardware, which allows to evaluate power consumption of instruction execution in normal microprocessor operation mode;
- development of testing methods (calibration) of created hardware;
- using artificial neural networks to predict power consumption of the instruction execution modes (addressing, conditions, etc.) which were not completely tested experimentally;
- using the experiment planning methods for additional decreasing of experiments volume.

[Project 16] Human Biometric Identification in Video Surveillance Systems

Foreign partner: Technical University of Sofia, Bulgaria

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Bulgaria: Dr. Ognian Bumbarov

Duration: 2009 – 2010

Objectives: design of intelligent biometrical sub-system for detection and recognition of human faces in the video surveillance systems for monitoring of public places, database support of staff or factory's visitors etc.

Main tasks:

- development of methods and algorithms for movement detection on the captured videoframes;
- development of methods and algorithms of videoframes preliminary processing by skin color;
- improvement of methods and algorithms for detection and tracing of human face;
- development of methods and algorithms for face recognition.

[Project 17] Parallel Grid-aware Library for Neural Networks Training – PaGaLiNNeT

Principal investigator: Dr. Volodymyr Turchenko

Scientific advisor: Prof. Anatoliy Sachenko

Partners: Prof. Lucio Grandinetti, Center of Excellence on High Performance Computing, Department of Electronics, Computer Science and Systems, University of Calabria, Italy.

Grant No FP7 MC IIF 221524 – 908524 according to the 7th EU Frame Programme, Grant of Marie Curie for researches from the third countries (International Incoming Fellowships – IIF), return phase

Duration: 2011 – 2012

Objectives: development of the enhanced training methods for artificial neural networks in heterogeneous parallel computing systems within the Grid; providing the high efficiency of parallelization and development of the Grid-based library for parallel neural networks training.

Main results:

- As a part of the project design three levels of grid-based library are created: (i) at the level of a single supercomputer / cluster homogeneous computing nodes, (ii) at the heterogeneous computing nodes within a cluster, (iii) at the grid of computing system with heterogeneous hosts and heterogeneous communication channels between them. A parallel version of the library for the level (i) was installed on parallel machines with ccNuma architecture. A strategy for resource brokering based on Pareto optimization [1] is implemented in C programming language and included in the library. The developed library for the level (i) which includes the routines for parallel training of multilayer perceptron [2] and recurrent neural network was used for the prediction of the stock price for financial markets. The results are published in [6]. A parallel version of the library for the level (ii) was developed and installed on the computing cluster of heterogeneous architectures. The resource brokering sub-routine based on Pareto optimization [1] is called from the code of resource broker separately before executing the main task. The performance analysis of computing nodes of the cluster is based on a modified BSP-based model with improved computational complexity of parallel training algorithm for multilayer perceptron [2]. The results are published in [5];
- Within the application of parallel algorithms for neural network training to speed up the execution of practical tasks, an application task of convolution neural network for the detection of the number of micronucleus in the human lymphocytes is considered. The accurate detection of the number of micronucleus in the human lymphocytes can be used as biological dosimeter in order to relieve the presence and the action of carcinogenic factors and could enhance the correctness of the final medical response. It was proven the application of convolution NN for the development of this task because this NN model provides good detection properties and showed good detection results of the more complicated task of human face detection. The human lymphocyte images were acquired by the image flow cytometer which causes the different types of noise that influence on the acquired image. We have tested the CNN for the images altered by a zoom factor. The CNN provides no false alarms for each zoom factor. The number of false negative detections is much lower in comparison with the pattern matching method, implemented as a LABVIEW routine (IMAQ Match Pattern method) inside the flow cytometer. The detection rate of 87.5% provided by the CNN is much higher than 25% of detection rate by the IMAQ Match Pattern method on the considered example images. The results are published in [3, 4].

[Project 18] Development of Intelligent Video Surveillance Systems

Principal investigator: Dr. Volodymyr Kochan

Project executed together with the Glushkov Institute for Cybernetics, Prof. Vitaliy Boyun.

Duration: 2009 – 2010

Objectives: development of highspeed and relevant video surveillance system on the basis of intelligent videocamera, which allows us to decrease information streams between camera and workstation central processor, as well as to read and process large images with high frame rate.

Main tasks:

- increasing of efficiency of communication channels between intelligent videocamera and personal computer;
- development of methods and algorithms for videoframes preliminary processing by skin color and movement;
- development of methods and algorithms for human face recognition on the basis of the combined cascades classifiers, classifier training paralleling, and improvement of neural network training method in the frame of combined cascade;
- development of algorithms for faces tracing;
- development of software and highlevel programe interface for interaction with intelligent camera; coding of developed algorithms in processor computer code for digital processing of intelligent videocamera images.

[Project 19] Development of 3D Localization Methods for Navigation of Mobile robot

Foreign partner: Kaunas Technical University, Lithuania

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Lithuania: Prof. Rimvydas Simutis

Duration: 2009 – 2010

Objectives: developing the unified structure for autonomous mobile robot control and providing 3D localization and navigation in non-structured environment with dynamical objects by using new methods and means which allow us to improve the navigation characteristics of mobile robots and use already known methods for new applications.

Main tasks:

- 1) Analysis of already known methods for designing the structure of control system for mobile robots (MR) and development of unified structure for autonomous MR control.
- 2) Development of Dataflow Diagram (DFD) for robot control system and analysis of time characteristics of DFD main modules. Setting of requirements for main MR modules.
- 3) Development of improved methods and means of MR control system:
 - a) Development of new method of acquisition and processing of sensor data;
 - b) Development of MR 3D localization methods.
- 4) Development of hardware and software for autonomous MR.
- 5) MR composing according to the requirements set in point 2, taking into account the applied problems and MR hardware/software means developed in points 3-4.
- 6) Verification and testing of MR prototype functioning.

[Project 20] Development of Stereovision Methods and Devices for Autonomous Navigation of Mobile Robots

Foreign partner: University of Sigen, Germany

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Germany: Prof. Hubert Roth

Duration: 2008 – 2009

Objectives: Development of stereovision methods for autonomous navigation of mobile robots.

Main tasks:

- Development of stereo camera preliminary data processing methods for future integration with a mobile robot:
- Methods of generation of stereo images;
- Image filtering and analysis methods.
- Development of stereo image fusion and mobile robot 3D environment map generation techniques:
- Image description methods;
- Stereo image corresponding points search and 3D environment map generation methods.
- Development and implementation of sensor data fusion algorithms.
- Verification and testing of the developed methods using a mobile robot.

[Project 21] Development of Design and Optimization Methods for Breach Detection Systems

Foreign partner: Institute of Technology, Gebze, Turkey

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Turkey: Dr Serkan Aksoy

Duration: 2008 – 2009

Objectives: development of a Computer Aided Design (CAD) system for development of perimeter security systems optimized for quality-price, reliability-price criteria and further testing of the CAD system on real security systems.

Main tasks:

- Analysis of existing solutions and formation of a set of criteria and limitations for functional and cost analysis of security systems. Development of improved components and database for security systems.
- Development of methods and algorithms for structural synthesis and multi-criteria optimization of security systems. Development of a CAD system for security systems design based on the developed methods and algorithms.
- Development of a pilot security system with the use of the developed CAD. Testing of the pilot system.
- Carrying out a comparative analysis of the developed pilot system against existing systems. Introduction of necessary changes to the CAD system based on the conducted analysis.
- Carrying out the pilot security system testing to measure risks of undetected intrusions and risks of false alarms. Introduction of necessary changes to the pilot security system based on the conducted tests.
- Testing of the CAD system.

[Project 22] Computer Telecommunication System Based on Noise Signals

Principal investigator: Prof. Yaroslav Nikolaychuk

Project is executed together with JSC Ternopil Radio Plant 'Orion', chief designer Volodymyr Kordyak.

Duration: 2007 – 2009

Objectives: to increase noise-immunity and active range of radio stations, produced by the Orion plant; introduce a mode of code based on division of transmission channels; develop a computerized system of data acquisition based on autonomous sensors.

Project tasks:

- Design of a noise-signal based radio station with a low range of operation for construction companies;
- Analysis of possible application areas for 2D noise signals;
- Analysis of possible application areas and prospective customers of computer systems based on autonomous sensors.
- Preparation of project solutions related to radio system serving and construction areas.

[Project 23] Dynamically Reprogrammable Network Capable Application Processor with Internet Capability

Foreign partner: Esensors Inc., USA

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from USA: Dr Darold Wobschall, PhD

Grant #UE2-2534-TE-07.

Duration: 2007 – 2009

Objectives: to enter the US smart sensors market with the Network Capable Application Processor (NCAP) developed within the project CRDF #UE2-2534-TE-03 – device oriented on software data processing in smart distributed measurement and control systems which uses adaptive software reconfiguration for intelligent functions execution (self-adapting and self-training). The developed NCAP will have the following features:

- ability to work in distributed measurement control systems utilizing the Internet;
- online remote reprogramming of user application software;
- support of a wide set of network interfaces;

Main tasks:

- the minimal set of the design documentation sufficient for production of a prototype NCAP was developed;
- two prototype NCAP devices have been developed and undergo testing;
- testing of certain NCAP modules was performed, the NCAP software was developed as well.

[Project 24] Ternopil Education Communication Center

Foreign partner: University of Maine, USA

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from USA: Prof. George Markowsky

Project is granted by NATO Program of Security through Science Network Infrastructure Grant, and performed together with the University of Maine, USA.

Duration: 2006 – 2009

Objectives: create common communication center for universities of Ternopil, integrate educational networks of Ternopil Universities, introduce high-speed network for training and research.

Main tasks:

- Connect educative institutions of Ternopil to Internet through Ternopil Education Communication Center;
- Make a basis for cooperation of all universities of Ternopil;
- Make a basis for educative and research cooperation between universities of Ternopil and University of Maine and other researchers;
- Provide high-speed access to UARNET and GEANT networks;
- Provide abilities for holding video-conferences between Ternopil and other cities;
- Develop a prototype of a system, that can be implemented in other areas of Ukraine;
- Implement 16 processor clusters for GRID-processing that will be used in universities – project members;
- Introduce on-line library;
- Provide Wi-Fi service for universities of Ternopil.

Team:

- Anatoliy Sachenko
- Serhiy Voznyak
- Ihor Romanets'
- Roman Romanyak

[Project 25] Instruction Parameters Analysis for Power Modeling of Embedded Microprocessors

Foreign partner: Aristotle University of Thessaloniki, Thessaloniki, Greece

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Greece: Prof. Theodore Laopoulos

Project is granted by Ministry of Education and Science of Ukraine and Greek Government (agreement #M/85-2006), and performed together with the Aristotle University of Thessaloniki, Greece.

Duration: 2006 – 03.2008

Objectives: to determine power consumption of each parameter while executing the following instructions by the processor: determining number and value of registers, immediate values, values and addresses of operands, address of command call, pipeline panel and substitution, examination and analysis of correlation of instruction parameters in power consumption of instructions; examination and analysis of each parameter in power consumption of instructions; developing accurate power models for execution level of ARM7TDMI processor instructions.

Main tasks:

Additional investigating of instruction parameters power consumption and developing of measurement methodology using existing measurement setup; developing new approach in measurement methodology that can determine processor configuration. Due to this approach it is possible to measure and analyze correlation of instruction power consumptions according to instruction parameters; determine power consumption; analyze and process power consumption values; develop power models for instructions; experimentally prove achieved theoretical results.

[Project 26] Financial Analytics Method with Applications of Knowledge Bases

Principal investigator from RIICS: Prof. Anatoliy Sachenko

This is a joint project between National University of the State Taxation Department of Ukraine, Irpin, Ukraine and Research Institute for Intelligent Computer Systems, Ternopil, Ukraine.

Duration: 09.2008 – 11.2008

Objectives: evaluation of the present state and selection of priority directions for implementation of intelligent information technologies of financial analytics and knowledge bases in governmental resource management processes.

Main tasks:

- evaluation of the present state and investigation of theoretical research in information technologies for financial analytics with application of knowledge bases in management of governmental institutions;
- investigation of possible intelligent computer technologies application in the domain of financial analytics ontologies in governmental management;
- evaluation of the state and perspectives of ontology intelligent tools using methods of financial analytics;
- development of technologies in area of intelectulazation of information-analytical processes and creation of financial analytics knowledge bases in governmental management;
- the conducted activity enabled to provide functional completeness of solutions to the defined research tasks and creation of documentation as per the Requirements Specification;
- research and creation of the output documentation were performed on the basis of a systematic approach, conceptual completeness of results and consistency;
- the conducted work follows the principal of minimal implementation costs for the proposed solutions.

[Project 27] Development of Effective GRID-technologies for Ecology Monitoring Using Satellite Data

Principal investigator from ICS: Prof. Anatoliy Sachenko

Principal investigator NSAU: Prof. Nataliya Kussul

Collaborative project of Scientific-Technologic Centre in Ukraine and National Sciences Academy of Ukraine has been performed together with the Space Research Institute of National Sciences Academy of Ukraine and National Aerospace Agency of Ukraine, Kyiv.

Grant STCU #3872

Duration: 12.2005 – 12.2007

Objectives: Development of an effective distributed computations techniques that provide simple and transparent solutions to the computationally-complicated tasks in different areas, especially associated with space data processing.

Main tasks:

- developing methodology for constructing temporal interpolation earth atmosphere photographs;
- developing methodology for predicting solar activity and corresponding algorithms for holding parallel computations;
- developing parallel implementation modeling methods algorithms for dynamics of main processes in multi-component ground environments with the corresponding cluster.
- developing GRID-service for monitoring and control solutions process in systems;
- developing GRID-service for balancing system loading;
- developing GRID-service for visualization of computational results;
- developing GRID-service for granting users' access to system;
- developing service for system security purposes;
- combining some clusters or computational networks into one complex for searching solution to the same task.

Team:

- Anatoliy Sachenko
- Volodymyr Turchenko
- Viktor Demchuk

Published results:

[Project 28] Development of Web Ontologies as Data Exchange and Decision Support Tools to Facilitate Economic Cooperation between Ukraine and USA

Foreign partner: New Jersey Institute of Technology, USA

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from USA: Dr. Yefim Kats

Project had been performed according to Research program of the US National Science Foundation.

Grant # NSF-04-12

Duration: 2004 – 2007

Objectives: develop Web-ontologies as data exchange and decision making instrument for promotion of economic partnership between Ukraine and USA.

Main tasks:

- Standard ontology dictionary used in economic interchange, including dictionaries for typical e-commerce models, identification.
- Identifying objects as classes or relations with adequate limiting interpretation.
- Identifying specific ontology relations for (intelligence) agents based on automated processing.
- Developing Windows object library compatible apparatus for measuring possible ontology errors.

Team:

- Anatoliy Sachenko
- Roman Pasichnyk
- Yuriy Pihovsky
- Andrii Melnyk

Published results:

4. Master thesis by Andrii Melnyk was defended in 2006.
5. Course thesis by Andrii Melnyk was defended in 2005.
6. Master thesis by Vitaliy Kharchuk was defended in 2004.

[Project 29] Dynamically Reprogrammable Network Capable Application Processor with Internet Capability

Principal investigator: Prof. Anatoliy Sachenko

The project is funded under the Ministry of Education and Science of Ukraine

Grant #0107U005985.

Duration: 08.2007 – 12.2007

Objectives: to enter the US smart sensors market with the Network Capable Application Processor (NCAP) developed within the project CRDF #UE2-2534-TE-03 – device aimed at software data processing in smart distributed measurement and control systems which uses adaptive software reconfiguration for intelligent functions execution (self-adapting and self-training). The developed NCAP will have the following features:

- ability to work in distributed measurement control systems utilizing the Internet;
- online remote reprogramming of user application software;
- support of a wide set of network interfaces.

Main tasks:

- a minimal set of the design documentation sufficient for production of a prototype NCAP had been developed, which allowed to choose its elemental basis and embodiment;
- there was developed a package of structural documentation;
- there was developed software for interface microcontroller providing software support of hardware drivers for supported interfaces – data link layer, IP protocol (Internet Protocol) – network layer, TCP protocol (Transport Control Protocol) – transport layer, HTTP protocol (Hypertext Transfer Protocol) – session layer, dynamical HTML-page, where the data is presented and received by all supported interfaces and can be read – presentation layer;
- two prototype NCAP devices had been developed and underwent testing that allows to debug application software of its microcontrollers and their interaction between each other, as well as with the server and measuring-control modules in real time.

Team:

[Project 30] Investigation of the Intelligent Properties of Re-Configurable Network Capable Application Processor in Adaptive Distributed Instrumentation and Control Systems

Foreign partner: Sensors Development and Applications Group, National Institute Standards and Technologies, USA

Principal investigator from Ukraine: Dr. Volodymyr Kochan

Principal investigator from USA: Kang Lee

This project has been performed within US Civilian Research and Development Foundation (Cooperative Grant Program).

Grant # CRDF.CGP. UE2-2534-TE-03

Duration: 2005 – 2006

Objectives: Development of the IEEE-1451 standard compatible Network Capable Application Processor (NCAP) with dynamic software and hardware reconfiguration and investigation of its self-adaptive and intelligent properties in information-measurement systems.

Main tasks:

- Investigation of the NCAP intelligent properties to be used with smart sensors, deployed in distributed information measurement systems with different architectures and functional requirements.
- Extension of the NCAP's functional features compatible with the IEEE1451 standard to support dynamic online reprogramming of software and a set of network interfaces.
- Development and investigation of the prototype NCAP and its programming methodology.

[Project 31] Methods and Algorithms for Face Detection and Recognition for Real Time Video Surveillance Systems

Foreign partner: Belarus State University of Informatics and Radio Electronics, Belarus

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Belarus: Prof. Rauf Sadykov

This project has been performed in frames of State fund of fundamental research programs, Ministry of Education and Science of Ukraine order #356 dated to 14.06.05.

Duration: 2005 – 2006

Objectives: Development of algorithms for preliminary processing of images based on segmentations and development of algorithms and software for face detection in static vision conditions.

Main tasks:

- Development of effective algorithms and software for capturing face images in video stream;
- Development of approximate 3-dimension face models;
- Development of algorithms for selection of informative features and classification of images according to modified syntactical discriminator functions;
- conducting experimental diagnosis and configuration of proposed algorithms for achieving maximum results of program model;
- development of a software system which implements the designed recognition scheme.

Team:

- Anatoliy Sachenko
- Vasyl Koval
- Ihor Paliy
- Yuriy Kurylyak
- Victor Kapura

[Project 32] Development of Methods and Tools for Improvement of Robot Navigation in a non-Structured Environment

Foreign partner: Kaunas Technical University, Lithuania

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Lithuania: Dr Arunas Raudis

This project has been performed in frames of State Fund for Fundamental Research Programs, Ministry of Education and Science of Ukraine order #174 dated by 23.03.05.

Duration: 2005 – 2006

Objectives: Development of methods and tools for improvement of mobile robot navigation in non-structured environment.

Main tasks:

- Development of methodology for creation of a mobile robot management system, which reflects schemes for conforming mobile robot subsystems for ensuring unobstructed navigation in non-structured environment.
- Development and implementation of main concepts for processing sensor data and creating environmental local map to improve robot navigation in non-structured environment with the help of artificial neural networks.
- Development and implementation of effective and self-adaptive methods for robot navigation and pathway planning.
- Research of experimental methods (with the use of imitation modeling and neural network resources).

Team:

- Anatoliy Sachenko
- Vasyl Koval
- Oleh Adamiv
- Yuriy Kurylyak
- Maxym Lunochkin
- Serhiy Maystrenko

[Project 33] Development of Parallel Neural Networks Training Algorithms on Advanced High Performance Systems

Foreign partner: Parallel Computing Laboratory, Department of Electronics, Computer Science and Systems, University of Calabria, Italy

Principal investigator from Ukraine: Dr. Volodymyr Turchenko

Principal investigator from Italy: Prof. Lucio Grandinetti

Grant # INTAS YSF 03-55-2493

Duration: 2004 – 2006

Main tasks:

- Develop a parallel algorithm of enhanced data integration method using C programming language and MPI parallelization technology.
- Design and implement in C programming language and MPI parallelization technology two new methods of coarse-grain neural network parallelization which provides high efficiency of parallelization at the certain training parameters of neural networks and dynamic mapping method, which is more universal than static and shows better efficiency at different initial parameters of neural networks and provides parallelization. A series of on-line computational experiments of the above mentioned algorithms of the parallel machines SGI Origin 300, NEC TX-7 is performed and the computational grid consists of the cluster of double-processor Compaq personal computers under Linux operation system and Globus middleware package.
- Develop and implement in C programming language using MPI and MPE libraries the fine-grain parallel training algorithm of multilayer perceptron with parallelization of the outputs of hidden layer neurons at the initial stage of information processing inside neural network module.
- Compare the advantages and disadvantages of middleware technologies, in particular Globus, in a case of coarse-grain parallelization algorithm of Integration Historical Data Neural Networks with dynamic mapping on the parallel computer Origin 300 without using middleware package and on the computational grid operated by Globus middleware package.

[Project 34] Development of a Web-based Measurement System with Distributed Intelligence

Foreign partner: Laboratory of Signal Processing and Information Measurement University of Sannio, Benevento, Italy

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Italy: Prof. Pasquale Daponte

Project was performed under the Ministry of Education and Science of Ukraine order #M/79-2004, state registration #0104U006975.

Duration: 2004 – 2006

Objectives: to create a distributed measurement system (based on Intranet and Internet technologies), that can provide high accuracy sensor data processing by the use of artificial neural networks. The system's feature is remote units working in real time mode during long delays in data link layer, and costs decrease is achieved by shifting of some intelligent functions to a main server.

Main tasks:

- Development of distributed measurement system architecture with either Internet- or Intranet-technologies.
- Research and design of networked software structures. Development of software for distributed system using Web-technologies.
- Testing and verification of the developed software for distributed measurement system.

Team:

- Anatoliy Sachenko
- Volodymyr Turchenko
- Volodymyr Kochan
- Roman Kochan
- Iryna Turchenko

[Project 35] Design of Distributed Sensor Network for Ayers Island Security Using Value Analysis Technology

Foreign partner: Department of Computer Science, University of Maine, USA

Projects investigator from Ukraine: Prof. Anatoliy Sachenko

Projects investigator from USA: Prof. George Markowsky

Project had been performed within the frames of the First Steps to Market program of the US Civilian Research and Development Foundation.

Grant # CRDF FSTM UM2-5012-TE-03

Duration: 2003 – 2005

Objectives: investigating possibilities for developing distributed sensor network with defined features for providing security Ayers Island, Orono, ME, USA.

Main tasks:

- Analyze component and perimeter security systems vendors, examine well-known perimeter security systems.
- Propose algorithm for defining key functional indicators for perimeter security distributed systems components that can optimize preparing procedure for CAD, intended for design and optimization according to functional-price characteristics security system. This algorithm usage filled DB with functional-price characteristics for perimeter area security systems components that are unified and eligible for creating CAD.
- Morphological matrix method was proposed for optimization according to functional-price characteristics of designed security systems and selecting variants of DSN that create Paret boundaries for all alternative variants according to two key functional characteristics.
- CAD software module was developed, functions for all modules were described, and major requirements to perimeter area security systems CAD were established. Proposed CAD allows us to design projects perimeter area security systems, using perimeter area security systems components database.
- Demonstrate CAD version that was used for developing perimeter area security systems for Ayers island in Orono, ME according to quality, reliability and price characteristics.

[Project 36] Development of Intelligent Precision System for Thermal Objects Control

Foreign partner: Department of Automatics, the University of Mons, Belgium

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Belgium: Prof. Marcel Remy

The project had been performed under the NATO (Cooperative Science & Technology Sub-Program).

Grant NATO PST.CLG.977647

Duration: 2002 – 2004

Objectives: development of precision and self-adaptive temperature control system for temperature objects with multi-zone linked control.

Main tasks:

- Analysis of precision thermal objects and their control systems;
- Analysis of error control system components and ways for reducing their influence on general system error.
- Development of constructive-technological and structural-algorithmic methods for improving accuracy of measuring channels and control channels for multi-zone thermal objects.
- Development of result processing methods for defining thermal objects parameters.
- Adaptation of random small perturbation method for thermal objects with multi-zone linked control.

[Project 37] Using Multisensor Fusion and Neural Networks Techniques for Robot Control

Foreign partner: Laboratory of Robotics Systems, University of La Coruña, Spain

Principal investigator from Ukraine: Prof. Anatoliy Sachenko

Principal investigator from Ukraine: Prof. Richard Duro

The project had been performed under the NATO (Cooperative Science & Technology Sub-Program).

Grant NATO PST.CLG.978744

Duration: 2002 – 2004

Objectives: development and implementation of main concepts of merging sensor data, using neural networks for controlling mobile robot. It is assumed that robot moves in unknown (dangerous for human) environment. Main purpose is the endpoint reached through obstructions.

Main tasks:

- Development of new methods for merging sensor data, using neural networks.
- Development of algorithms and software for merging sensor data subsystem.
- Hardware implementation of merging methods for sensor data on mobile robot.
- Verification and testing procedures of developed engines for merging sensor data on mobile robot.

[Project 38] Development of an Intelligent Sensing Instrumentation Structure

Foreign partners: Electronic Laboratory, Aristotle University, Thessaloniki, Greece, Parallel Computations Laboratory, University of Calabria, Italy, Department of Electronics at Brest Polytechnic Institute, Belarus.

Principal investigator from Ukraine: Prof. Anatoliy Sachenko
 Principal investigator from Greece: Prof. Theodore Laopoulos
 Principal investigator from Italy: Prof. Lucio Grandinetti
 Principal investigator from Belarus: Prof. Volodymyr Golovko

The project had been performed under the “INTAS Open Call” program, grant # INTAS OPEN 97-0606.

Duration: 1999 – 2001

Objective: development of information measurement system for increasing measurement accuracy using automated correction of instrumental compound measurement error.

Research tasks:

- Target area analysis and requirements definition for intelligent sensor measurement system;
- Development of distributed structure for intelligent sensor measurement system;
- Development of methods for evaluating the results of processing with the target objective to increase the system operational characteristics;
- Development and testing of the prototype intelligent sensor measurement system.

4. RESEARCH ACTIVITIES

IDAACS Conferences and Symposia

A – IDAACS Conferences

Prof. Lucio Grandinetti (Italy), Prof. Theodore Laopoulos (Greece) and Prof. Anatoliy Sachenko (Ukraine) proposed the idea of IDAACS Workshop during the working meeting in Cetraro, Italy, in June 2000. One of the main strategic goals of IDAACS is promotion of the close scientific cooperation between the research teams and scientists from the countries of Western and Eastern Europe. Therefore, the Workshop's motto is "IDAACS – the crossing point of Intelligent Data Acquisition & Advanced Computing Systems and East & West Scientists". In 2011 the name 'IDAACS Workshop' has transformed in 'IDAACS Conference'. Since 2001 the following IDAACS Workshops and Conferences have been organized:

- IDAACS'2001. July 1-4 2001, Foros, Crimea, Ukraine.
 - Workshop Chairman: Anatoliy Sachenko
 - Co-Chairmen of International Program Committee (IPC): Theodore Laopoulos, Greece, Robert E. Hiromoto, USA
 - Statistics: 70 participants, 18 countries, 112 papers, 30 oral and 35 poster presentations, 280 P., 1 Vol.
 - Special Issues: International Journal of Computing
 - Sponsors: INTAS, NEC, HP invent, Science & Technology Center in Ukraine (STCU), Aval bank, Institute of Computer Information Technologies, IEEE Instrumentation & Measurement Society, IEEE Region 8.
- IDAACS'2003. August 8-10 2003, National University "Lviv's Polytechnic", Lviv, Ukraine.
 - Workshop Co-Chairmen: Anatoly Sachenko, Bohdan Stadnyk, Ukraine
 - IPC Co-Chairmen: Lucio Grandinetti, Italy, Fernando Lopes Pena, Spain
 - Statistics: 85 participants, 21 countries, 112 papers, 60 oral and 52 poster presentations, 529 P., 1 Vol.
 - Special Issues: International Journal of Computer Standards & Interfaces, IEEE Transactions on Instrumentation and Measurement, International Journal of Computing, Sensors & Systems
 - Sponsors: Ternopil Academy of National Economy (TANE) of IEEE Instrumentation & Measurement Society, STCU at MES of Ukraine, Aval bank.
- IDAACS'2005. September 5-7 2005, Technical University of Sophia, Sophia, Bulgaria.
 - Workshop Co-Chairmen: Anatoliy Sachenko, Ukraine, Plamenka Borovska, Bulgaria
 - IPC Co-Chairmen: Domenico Grimaldi, Italy, Peter A. J. Reusch, Germany
 - Statistics: 99 participants, 27 countries, 147 papers, 96 oral and 51 poster presentations, 738 P., 1 Vol.
 - Special Issues: International Journal of Computer Standards & Interfaces, IEEE Transactions on Instrumentation and Measurement, Journal of Computing, Sensors & Systems
 - Sponsors: TANE, Technical University of Sophia, STCU, IEEE Bulgaria Section, IEEE Computer Chapter of Bulgaria Section.
- IDAACS'2007. September 6-8 2007, University of Applied Sciences Fachhochschule Dortmund, Dortmund, Germany.
 - Workshop Co-Chairmen: Anatoliy Sachenko, Ukraine, Peter J. A. Reusch, Germany
 - IPC Co-Chairmen: Richard Duro, Spain, Wieslaw Winiecki, Poland

- Statistics: 105 participants, 35 countries, 180 papers, 95 oral and 52 poster presentations, 720 P., 1 Vol.
- Special Issues: IEEE Transactions on Instrumentation and Measurement, Journal of Computing, Sensors & Systems
- Sponsors: TNEU, University of Applied Sciences Fachhochschule Dortmund, IEEE Instrumentation & Measurement Society, RWE Systems AG, DSW21, Anna and Hermann Reusch Foundation, the Deutsche Forschungsgemeinschaft (German Research Foundation).

- IDAACS'2009. September 21-23 2009, Department of Electronics, Informatics and Systems, University of Calabria, Rende, Italy.
 - Workshop Co-Chairmen: Anatoliy Sachenko, Ukraine, Domenico Grimaldi, Italy
 - IPC Co-Chairmen: Vladimir Oleschuk, Norway, Dominique Dallet, France
 - Statistics: 122 participants, 25 countries, 142 papers, 86 oral and 56 poster presentations, 722 P., 1 Vol.
 - Special Issues: River Publishers, International Journal of Computing
 - Sponsors: Ukraine I&M / CI Joint Societies Chapter, University of the Calabria, Department of Electronics at University of the Calabria, IEEE Ukraine Section, IEEE Instrumentation & Measurement Society, IEEE Italy Section, IEEE Region 8. Workshop participants approved the IPS proposal to change the status from "Workshop" to "Conference"

- IDAACS'2011. September 15-17 2011, Czech Technical University in Prague, Prague, Czech Republic.
 - Conference Co-Chairmen: Anatoliy Sachenko, Ukraine, Domenico Grimaldi, Italy
 - IPC Co-Chairmen: Dana Petcu, Romania, Axel Sikora, Germany
 - Statistics: 197 participants, 32 countries, 197 papers, 96 oral and 51 poster presentations, 738 P., 1 Vol.
 - Special Issues: International Journal of Computing, Sensors & Transducers Journal, Computer Standards & Interfaces.
 - Sponsors: IEEE Ukraine I&M / CI Joint Societies Chapter, TNEU, Czech Technical University in Prague, Faculty of Electrical Engineering at Czech Technical University, Office of Naval Research, Honeywell spol. S r.o., H TEST a.s., authorized distributor of Agilent Technologies Agilent Technologies H TEST a.s., IEEE Ukraine Section, IEEE Czechoslovakia Section, IEEE Instrumentation & Measurement Society, IEEE Region 8, River Publishers.

- IDAACS'2013. September 12-14, 2013, Hochschule für Technik und Wirtschaft, University of Applied Sciences Berlin (HTW Berlin), Berlin, Germany.
 - Conference Co-Chairmen: Anatoliy Sachenko, Ukraine, Jürgen Sieck, Germany
 - IPC Co-Chairmen: Vladimir Haasz, Czech Republic, Kurosh Madani, France
 - Statistics: 185 participants, 28 countries, 185 papers, 120 oral and 60 poster presentations, 940 pages, 2 volumes.
 - Special Issues: River Publishers, Journal of Cyber Security and Mobility, International Journal of Computing, Elsevier Engineering Applications of Artificial Intelligence, Sensors & Transducers Journal.
 - Sponsors: IEEE Ukraine I&M / CI Joint Societies Chapter, TNEU, University of Applied Sciences in Berlin, IEEE Instrumentation & Measurement Society, Office of Naval Research, The University of Maine, IEEE Region 8, River Publishers, IEEE Ukraine Section.

- IDAACS'2015. September 24-26, 2015, Faculty of Electronics and Information Technology and Faculty of Mathematics and Information Science, Warsaw University of Technology, Warsaw, Poland.
 - Conference Co-Chairmen: Anatoliy Sachenko, Ukraine, Wiesław Winiecki, Poland
 - IPC Co-Chairmen: Robert Hiromoto, USA, Linas Svilainis, Lithuania
 - Statistic: 180 participants, 29 countries, 185 papers, 24 oral and 3 poster sessions, 991 pages, 2 volumes.

- Special Issues: River Publishers, Journal of Cyber Security and Mobility, International Journal of Computing, Elsevier Engineering Applications of Artificial Intelligence.
 - Sponsors: IEEE Ukraine I&M / CI Joint Societies Chapter, TNEU, University of Applied Sciences in Berlin, IEEE Instrumentation & Measurement Society, Office of Naval Research, the University of Maine, IEEE Region 8, River Publishers, IEEE Ukraine Section.
- IDAACS'2017. September 21-23, 2017, Faculty of Automatic Control and Computer Science, University "Politehnica" of Bucharest (UPB), Romania.
 - Conference Co-Chairmen: Anatoly Sachenko, Ukraine, Grigore Stamatescu, Romania.
 - IPC Co-Chairmen: Dora Blanco Heras, Spain, John Kalomiros, Greece.
 - Statistic: 194 participants, 35 countries, 213 papers, 24 oral and 3 poster sessions, 1143 pages, 2 volumes.
 - Special Issues: River Publishers, International Journal of Computing.
 - Sponsors: IEEE Ukraine I&M / CI Joint Societies Chapter, TNEU, Faculty of Automatic Control and Computers, University "Politehnica" of Bucharest (UPB), Asti Automation, IEEE Ukraine Section, IEEE Romania Section, Romanian Society of Automation and Technical Informatics (SRAIT), TÜV AUSTRIA ROMANIA, Festo, River Publishers.
- IDAACS'2019. 18-21 September 2019 p., Technical Institute Ecole Nationale d'Ingénieur de Metz (ENIM) University of Lorraine, Metz, France.
 - Conference Co-Chairmen: Anatoliy Sachenko, Ukraine; Kondo Hloindo Adjallah, France.
 - IPC Co-Chairmen: Francesca Guerriero, Italy; Carsten Wolff, Germany
 - Statistics: 178 participants, 42 countries, 213 papers, two volumes (Volume 1, 1–578 pages, Volume 2, 579–1147 pages).
 - Special Issues: River Publishers
 - Sponsors: IEEE Ukraine Section I&M / CI Joint Societies Chapter; Research Institute for Intelligent Computer Systems; Ternopil National Economic University; ENIM (Ecole Nationale d'Ingénieur de Metz); LCOMS (Laboratory of Conception, Optimisation and Modelling of Systems); University of Lorraine; IEEE Ukraine Section; IEEE France Section; MDPI Sensors; River Publishers.

B – IDAACS Symposia

The first IEEE International Symposium on Wireless Systems within the Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS-SWS'2012) was held in 2012.

- IDAACS-SWS'2012. September 20-21'2012, University of Applied Sciences in Offenburg, Offenburg, Germany.
 - Symposium Honorary Chairman: Anatoliy Sachenko, Ukraine;
 - Workshop Co-Chairmen: Evren Eren, Uwe Grossmann, Juergen Sieck, Axel Sikora, Germany
 - Statistics: participants from 12 countries, 39 papers, 27 oral presentations, 127 P., 1 Vol.
 - Special Issues: International Journal of Computing, Sensors & Transducers Journal, Computer Standards & Interfaces.
 - Sponsors: Faculty of Electrical Engineering and Information Technology at Offenburg University of Applied Sciences, IEEE Ukraine Section IM/CIS Joint Chapter, IEEE Instrumentation & Measurement Society.

The second IEEE International Symposium on Wireless Systems within the Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS-SWS'2014) was held in 2014.

- IDAACS-SWS'2014. September 11-12'2012, University of Applied Sciences in Offenburg, Offenburg, Germany.
- Symposium Honorary Chairman: Anatoliy Sachenko, Ukraine;
- Symposium Co-Chairmen: Svitlana Antoshchuk, Volodymyr Brovkov, Ukraine, Evren Eren, Uwe Grossmann, Juergen Sieck, Axel Sikora, Germany
- Statistics: participants from 7 countries, 15 papers, 15 oral presentations, 127 P., 1 Vol.
- Sponsors: Faculty of Electrical Engineering and Information Technology at Offenburg University of Applied Sciences, IEEE Ukraine Section IM/CIS Joint Chapter, IEEE Instrumentation & Measurement Society.

The third IEEE International Symposium on Wireless Systems within the Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS-SWS'2016) was held in 2016.

- IDAACS-SWS'2016. September 26-27'2016, University of Applied Sciences in Offenburg, Offenburg, Germany.
- Symposium Honorary Chairman: Anatoliy Sachenko, Ukraine;
- Symposium Co-Chairmen: Volodymyr Brovkov, Ukraine, Evren Eren, Uwe Grossmann, Axel Sikora, Germany
- Statistics: participants from 9 countries, 24 papers, 24 oral presentations, 146 pages, 1 Volume
- Sponsors: Faculty of Electrical Engineering and Information Technology at Offenburg University of Applied Sciences, IEEE Ukraine Section IM/CIS Joint Chapter, IEEE Instrumentation & Measurement Society.

The fourth IEEE International Symposium on Wireless Systems within the Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS-SWS'2018) was held in 2018.

- IDAACS-SWS'2018. September 20-21'2018, National University "Lviv Polytechnics" (NULP) Lviv, Ukraine
- Symposium Honorary Chairman: Anatoliy Sachenko, Ukraine;
- Symposium Co-Chairmen: Ivan Prudyus, Orest Ivakhiv, Ukraine, Axel Sikora, Germany
- Co-Chairmen of IPC: Mykhaylo Klymash, Ukraine, Uwe Grossmann, Germany
- Statistics: participants from 12 countries, 51 papers, 146 pages, 1 Volume
- Sponsors: Lviv Polytechnic National University; Faculty of Electrical Engineering and Information Technology, Offenburg University of Applied Sciences; Research Institute for Intelligent Computer Systems, Ternopil National Economic University and V.M. Glushkov Institute of Cybernetics, National Academy for Sciences of Ukraine; IEEE Ukraine Section I&M / CI Joint Societies Chapter; IEEE Ukraine Section; Ministry of Education and Science of Ukraine; Cypress.

Fifth IEEE International Symposium on Smart and Wireless Systems within the International Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS-SWS'2020)

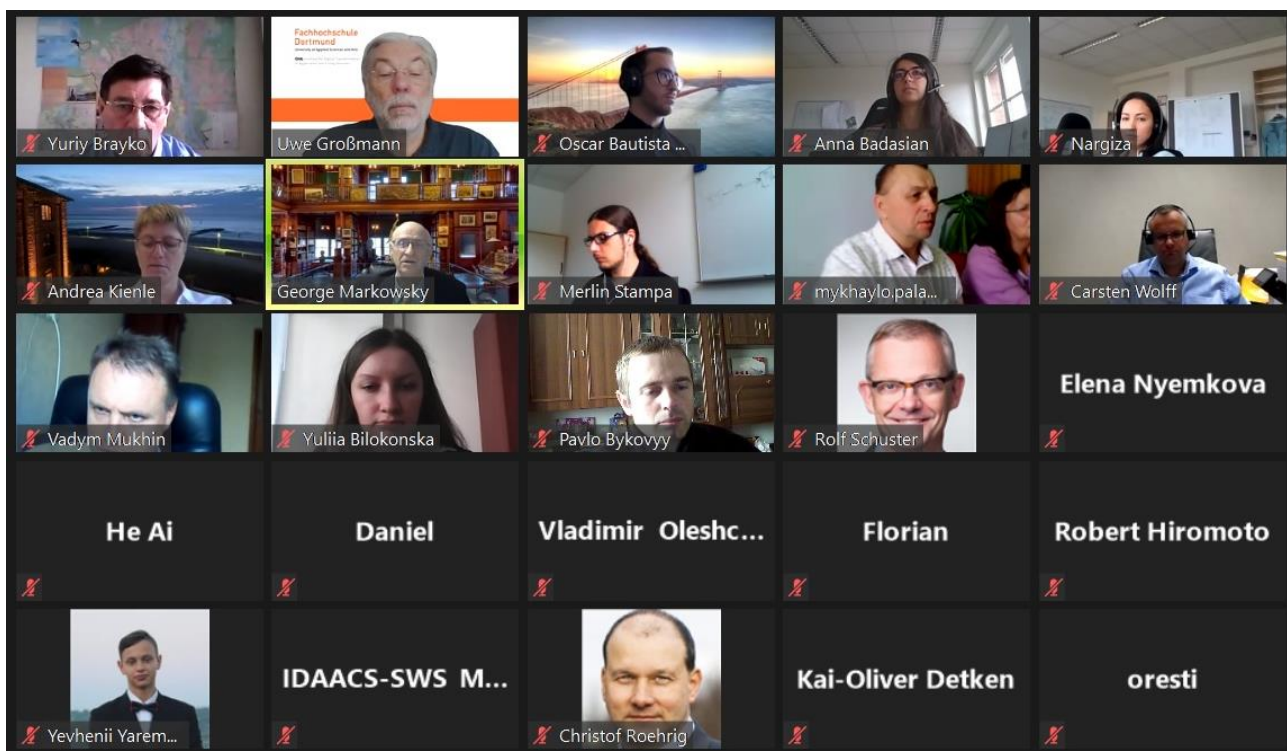

The fifth IEEE IDAACS-SWS'2020 was held online on September 17-18, 2020 at the Dortmund University of Applied Sciences and Arts (Fachhochschule Dortmund) Dortmund, Germany

Honorary chairman of the symposium: Anatoly Sachenko, Ukraine. Co-chairs of the symposium: Uwe Grossmann, Christof Roehrig, Axel Sikora, Carsten Wolff, (Germany) and Orest Ivakhiv (Ukraine). IPC co-chairs: Vladimir Oleshchuk (Norway) and Jürgen Sieck (Germany).

The international program committee consisted of 25 people. As a result of the review process, 60 articles out of 90 submitted from 23 countries (206 co-authors) were accepted, and 58 were published.

There were two reports by invited speakers: Prof. Kai-Oliver Detken (DECOIT GmbH, University of Applied Sciences, Bremen, Germany) "Intelligent anomaly detection using SIEM systems in information technology and operational technology environments" and Assoc. Taras Maksymiuk (Lviv Polytechnic National University, Ukraine) "How will blockchain and artificial intelligence shape the future evolution of the Internet beyond 5G?";

In 2 days, 76 participants were registered and took an active part in the sessions and discussions. The organizers of the conference were also impressed by the number of young scientists (20 reports were presented by master's and postgraduate students).

Unfortunately, due to the restrictions of COVID-19, it was not possible to hold the symposium on site in Dortmund, so we had to switch to an online format. Therefore, along with the traditional oral

and poster presentations (15 and 27, respectively), a new video presentation format (16 presentations) was introduced for this year's conference.

The following institutions and companies were involved in the organization and sponsorship of the symposium: Dortmund University of Applied Sciences and Arts (Fachhochschule Dortmund); Research Institute for Intelligent Computer Systems; IEEE Ukraine Section I&M / CI Joint Societies Chapter; IEEE Ukrainian Section; IEEE Germany Section IM Chapter; IEEE Germany Section; EuroPIM; River Publishers.

All accepted articles have been submitted for inclusion in IEEE Xplore (Scopus and Web of Science) as well as other databases (A&I).

International Journal of Computing

The International journal of Computing was founded on the basis of Branch Research Laboratory of Automated Systems and Networks in 2002. Its main goal is to present results in the field of Computer Science, Computer Engineering and Information Technology. The official language of the Journal is English. Journal is issued 4 times per year.

Since November 2016, the IJC Journal is indexed in Scopus Elsevier. In addition, the Journal is indexed by Finnish publication forum, Norwegian Social Science Data Services, Google Scholar, and Index Copernicus International.

The Journal's Editor-in-Chief is Prof. Anatoliy Sachenko, the Executive Editor is PhD, Dr Volodymyr Turchenko, and Associated Editors are Prof. Robert E. Hiromoto, University of Idaho, USA and Prof. Volodymyr Kochan. The Journal staff includes Mr. Taras Lendyuk, the Technical Editor, Dr Inna Shylinska, the Language Editor and Mrs. Halyna Kryva, the Economist.

The Editorial Board consists of more than 40 recognised scientists from 17 countries: Australia, Belarus, Bulgaria, Czech Republic, France, Germany, Greece, Italy, Japan, Lithuania, Norway, Poland, Portugal, Romania, Russia, Spain, Ukraine and USA.

Journal Topics are: Algorithms and Data Structure, Software Tools and Environments; Bio-Informatics; Computational Intelligence; Computer Modeling and Simulation; Cyber and Homeland Security; Data Communications and Networking; Data Mining, Knowledge Bases and Ontology; Data Science; Digital Signal Processing; Distributed Systems and Remote Control; Education in Computing; Embedded Systems; High Performance Computing, GRIDs, Parallel and Distributed Computing; Human-Computer Interaction; Image Processing and Pattern Recognition; Intelligent Robotics Systems; Internet of Things; IT Project Management; Systems and Control; Wireless Systems.

Specialized Scientific Council K58.082.02

Specialized scientific council in specialties:

- 05.13.05 – Computer Systems and Components;
- 05.13.06 – Information Technologies;

In 2020, the following dissertations were defended:

– **Mazurets O.I.** - candidate's thesis on the topic: "Information technology of automated structuring of educational materials and creation of tests for adaptive control of the level of knowledge" in the specialty 05.13.06 - information technologies. Scientific supervisor: Doctor of Technical Sciences, Professor Barmak O.V.

– **Zavhorodnya G.A.** - candidate's thesis on the topic: "Models, methods and information technology for increasing the reliability of an object of man-made danger" in the specialty 05.13.06 - information technologies. Scientific supervisor: Ph.D., associate professor Kornaga Y.I.

IEEE Instrumentation & Measurement/Computational Intelligence Joint Societies Chapter

The Instrumentation & Measurement / Computational Intelligence Joint Societies Chapter of IEEE Ukraine Section were established on June 7, 2005. A current Chairman of the Chapter is Prof. Volodymyr Kochan, and a current Vice-Chairman is Prof. Anatoliy Sachenko. The Chapter consists of 18 members from Lviv, Ternopil, Khmelnytsky, Kyiv, Zaporizhzhya, Odessa and Kherson, in particular:

Prof. S. Antoshchuk, Odessa National Polytechnic University
 Dr P. Bykovyy, Ternopil National Economic University
 Prof. M. Dorozhovets, Lviv National Technical University
 Prof. A. Drozd, Odessa National Polytechnic University
 Prof. O. Ivakhiv, Lviv National Technical University
 Prof. R. Kochan, Lviv National Technical University
 Dr O. Kochan, Ternopil National Economic University
 Prof. V. Kochan, Ternopil National Economic University
 Prof. V. Krylov, Odessa National Polytechnic University
 Dr S. Lysenko, Khmelnytsky National University
 Prof. V. Lytvynenko, Kherson National Technical University
 Dr V. Mukhin, National Technical University of Ukraine “Kyiv Polytechnic Institute”
 Dr O. Osolynskyi, Ternopil National Economic University
 Prof. S. Rippa, National University of the State Taxation Department of Ukraine
 Prof. A. Sachenko, Ternopil National Economic University
 Dr V. Turchenko, Ternopil National Economic University
 Dr G. Shilo, Zaporizhzhya National Technical University
 Dr V. Yatskiv, Ternopil National Economic University

List of technical meetings, which were held by I&M/CI Chapter:

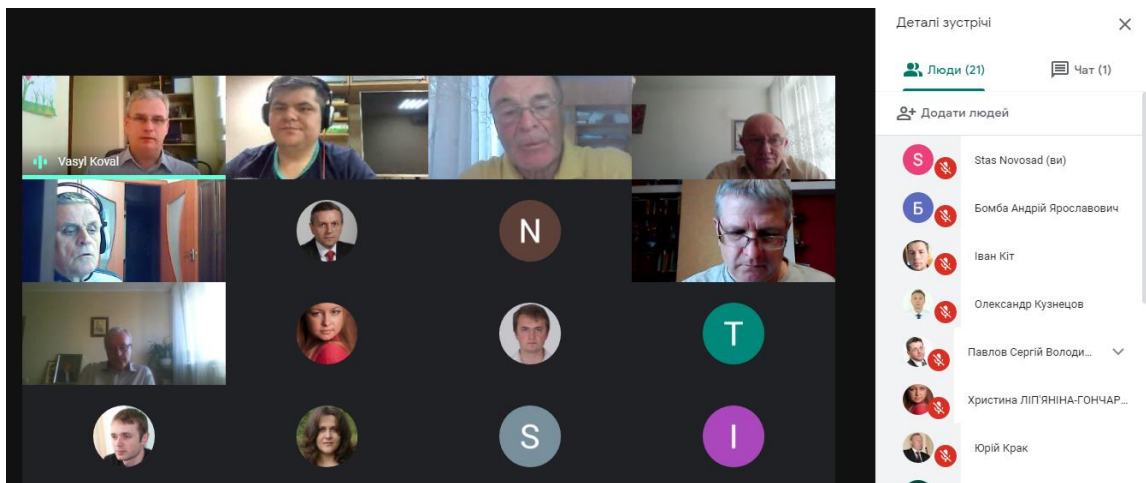

- I. On May 25, 2020, an online meeting of the IEEE I&M/CI Branch was held as part of the webinar of the Department of Information Computing Systems and Management. Presentations were presented: Doctor of Technical Sciences, Assoc. Koval Vasyl Serhiyovych on the topic "Getting to know the technology of creating and implementing Arduino projects: Controlled LEDs", and Ph.D., art. off Oleksandr Romanovych Osolinsky on the topic

"Peculiarities of using Arduino for the Internet of Things". There were 120 participants of the seminar.

- II. On June 10, 2020, an online meeting of the IEEE I&M/CI Branch was held as part of the international workshop "Advances & Challenges in Computing". Reports were presented:

Doctor of Technical Sciences, Professor of the Department of Information Systems and Networks, Institute of Computer Sciences and Information Technologies, Lviv Polytechnic National University, Volodymyr Pasichnyk on the topic: Information Technology-Smart Weapons and Locomotive of Victory in the War with Coronavirus: the Concept of Public IT Arsenal;

Candidate of Technical Sciences, H.E. Pukhov Institute of Modeling Problems in Energy, National Academy of Sciences of Ukraine, Ihor Kotsyuba on the topic: Digital Forensic Readiness in Critical and Smart Infrastructures.

Anatoly Sachenko, Doctor of Technical Sciences, Professor of the Department of Information and Computing Systems and Management, Ternopil National University, on the topic: Information about research projects, conferences and workshops. There were 21 participants of the seminar.

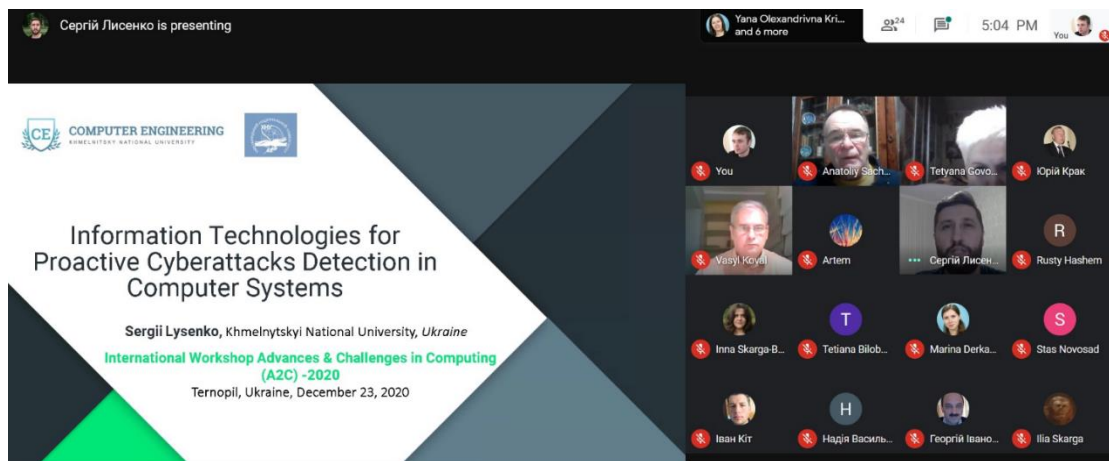

- III. On July 3, 2020, an online meeting of the IEEE I&M/CI Branch was held as part of the Dortmund International Summer School "Selected Perspectives on Data Science", which was held from June 29 to July 03, 2020 under the ViMaCs (Virtual Master's Interaction on Intelligent Data Processing) project. Presentations were presented: Ph.D. Mykhailo Dombrovsky "Data collection" and Ph.D. Oleksando Osolinsky "Data collection systems and IoT". There were 30 participants of the seminar.

- IV. On August 27, 2020, an online meeting of the IEEE I&M/CI Branch took place within the framework of the meeting of the specialized scientific council K58.082.02. Reports were presented: Zavorodnaya Hanna on the topic: "Models, methods and information technology for increasing the reliability of man-made hazards" and Oleksandr Mazurets on the topic: "Information technology for automated structuring of educational materials and creation of tests for adaptive control of knowledge level". There were 20 participants of the seminar.

- V. On September 17, 2020, as part of the international symposium IDAACS-SWS 2020 (The 5th IEEE International Symposium on Smart and Wireless Systems within the International Conferences on Intelligent Data Acquisition and Advanced Computing Systems), an online

meeting of the IEEE I&M/CI Branch was held. Reports were presented: Assoc. Pavlo Bykovo on the topic "Method of reliable data storage based on a redundant system of residual classes" and Assoc. Maksimyuk's track on the topic "How will blockchain and artificial intelligence shape the future evolution of the Internet beyond 5G?". There were 58 participants of the seminar.

- VI. On December 9, 2020, an online meeting of the IEEE I&M/CI Branch was held as part of the Dortmund International Winter Online School, which was held from December 7, 2020 to December 11, 2020 under the ViMaCs (Virtual Master's Interaction in Intelligent Data Processing) project. Reports were presented: prof. Anatoly Sachenko "Concept of data collection and processing" and Ph.D. Mykhailo Dombrovskiy "Collection of big data: SCADA system approach". There were 30 participants of the seminar.
- VII. On December 23, 2020, an online meeting of the IEEE I&M/CI Branch was held within the framework of the international workshop "Advances & Challenges in Computing". Reports were presented: Doctor of Technical Sciences. Serhii Lysenko (Khmelnyskyi National University) "Information technologies for detecting proactive cyber attacks in computer systems";

Prof. Inna Skarga-Bandurova (researcher at the Visual Artificial Intelligence Laboratory of Oxford Brookes University, researcher at the Department of Mathematical and Econometric Modeling at the H.E. Pukhov Institute of Modeling Problems in Energy, National Academy of Sciences of Ukraine) "Challenges of decision-making in medical robotics: on the way to autonomous surgical robotic systems";

Prof. Anatoliy Sachenko (scientific director of the Research Institute of Intelligent Computer Systems) "Information about research projects, conferences and seminars".

There were 30 participants of the seminar.

IEEE Student Branch

The Institute of Electrotechnical and Electronics Engineers (IEEE) Student Branch at Ternopil National Economic University (TNEU) was founded in 1998.

Student Branch involves students of the Faculty of Computer Information Technologies, PhD students and junior researchers of TNEU. The 3 active members of the Student Branch were in 2019. The Branch Committee consists of the Chairperson – O. Dunets, a Student Branch Advisor is Prof. Anatoliy Sachenko.

Members of the IEEE Student Branch at TNEU take a part in international schools as well as international conferences and projects. Also, they assisted in organization and preparation of the series of Intelligent Data Acquisition and Advanced Computing Systems: Technology and Applications (IDAACS)) – IDAACS'2003, IDAACS'2005, IDAACS'2007, IDAACS'2009, IDAACS'2011, IDAACS'2013, IDAACS'2015, IDAACS'2017 and IDAACS'2019.

The main advantages of IEEE membership include access to IEEE electronic resources, IEEE subscription in the scientific magazines and popular scientific literature “Spectrum”, “Computer”, “IEEE Transaction on Instrumentation and Measurement”; assistance and discounts for participation at international conferences, for example, being a member of IEEE a scientist could win a travel grant to the conference in the country region (Ukraine, along with Europe, Middle East and Africa, belongs to region 8). Almost all conferences sponsored by IEEE offer discounts to students for registration fee, participation in competitions organized by IEEE in the region.

Overall, IEEE supports scientific activities of students and young scientists, supporting them in the development of their scientific career, increases collaboration between scientists from different universities and international scientific – educational organizations. For example, IEEE members have access to a digital library of articles Xplore IEEE conferences, are printed journals IEEE, have the opportunity to join the scientific communities in different scientific fields can win grants to visit academic conferences and receive a discount when registering them. Also, between branches and regions there is a contest for the best scientific article or website and mobile robots. Each of these competitions is accompanied by cash prizes.

Other Research Activities

[Org 1] **Sergey Bushuyev**

- Reviewing 10 papers for international and national conferences.
- Reviewing 10 articles in international and national scientific journals.
- Member of the organizing / program committee:
 - Bukovel, February 2020, Strategic Project Management;
 - Kyiv, May 2020, Project Management in the Development of Society;
 - Mykolaiv, September 2020, Practical Aspects of Project Management;
 - Odessa, December 2020, Project management: Innovations, Nonlinearity, Synergetics

[Org 2] **Volodymyr Kochan**

- Member of the Editorial Board of International Journal of Computing.
- Reviewing the papers for international and national conferences.
- Member of the Specialized Scientific Council K58.082.02 at TNEU.
- Member of organizing committee of SWS-IDAACS'2020, 18-21 September 2020, Dortmund, Germany.

[Org 3] **Vasyl Koval**

- Member of the Specialized Scientific Council K58.082.02 at TNEU.
- Subreviewer of the International Conference “Modern Computer Information Technologies (ACIT'2020)”;
- Member of the support group of Specialty 122 – “Computer Sciences”;
- Manager of the research seminar “Advances & Challenges in Computing, A2C” hold by the Research Institute for Intelligent Computer Systems, TNEU;
- Head of the research seminar of the Department of ICSC, TNEU;

[Org 4] **Yaroslav Nykolaychuk**

- Reviewing articles in international and national scientific journals and conferences;
- Member of the Program Committee and Head of the 10 Workshop of the international conference “Advanced Computer Information Technologies”, (ACIT'2020);
- Member and a Vice-Chairman of the Specialized Scientific Council K.58.082.02 in WUNU.

[Org 5] **Roman Pasichnyk**

- Reviewing 8 papers in international and national journals and conferences;
- Member of the Program Committee and Head of the 10 Workshop of the international conference “Advanced Computer Information Technologies”, (ACIT'2020);
- Member of the Specialized Scientific Council K.58.082.02 in TNEU.

[Org 6] **Sergey Rippa**

- Reviewing the 11 papers for international and national conferences.
- Reviewing the 2 articles in international and national scientific journals.
- A member of specialized academic council K 27.855.01 at NUSTA.

[Org 7] **Anatoliy Sachenko**

- Chairman of the Specialized Scientific Council K58.082.02 at TNEU;
- Member of the Specialized Scientific Council D35.052.08 at National University “Lviv Polytechnics”;

- Editor-in-Chief, International Journal of Computing;
- Editor-in-Chief, “International Journal for Information Engineering and Electronic Business”;
- Acting as an opponent at the defense of one DsC and 3 PhD dissertations.
- Reviewing 23 papers for international and national conferences.
- Reviewing 3 PhD Theses.
- Co-Chairman of 10th IEEE International Conference on Intelligent Data Acquisition and Advanced Computing Systems: Technology and Applications (IDAACS 2020);
- Member of the Program Committee of 6 International Conferences.

[Org 8] Volodymyr Turchenko

- Deputy Editor at International Journal of Computing, participated in preparing four issues of the Journal, reviewed 3 articles.
- Reviewing papers for international conferences SWS-IDAACS’20, IJCNN’20, PDP’20, DCAI’20.
- Reviewing papers for journals Computer Science, Advances in Cyber-Physical Systems, IEEE Journal of Biomedical and Health Informatics.
- Reviewer of applications of the Fulbright Academic Exchange Program in Ukraine

[Org 9] Vasyl Yatskiy

- Member of the Program Committee of the international conference “Advanced Computer Information Technologies”, (ACIT’2020);
- Head of Cisco Networking Academy at Ternopil National Economic University.

5. ACADEMIC ACTIVITIES

Cooperation Agreements with Universities and Companies

- [Agreement 1] Belarus State University of Informatics and Radioelectronics, Minsk, Belarus.
- [Agreement 2] Brest State Technical University, Belarus.
- [Agreement 3] Donetsk National Technical University, Ukraine.
- [Agreement 4] Zaporizhya National Technical University, Ukraine.
- [Agreement 5] Institute for Cybernetics, National Academy of Sciences of Ukraine, Kyiv, Ukraine.
- [Agreement 6] Institute of Space Research, National Academy of Sciences of Ukraine and NCAO, Kyiv, Ukraine.
- [Agreement 7] Institute of Control, Russian Academy of Sciences, Moscow, Russia.
- [Agreement 8] Institute of Artificial Intelligence, Donetsk.
- [Agreement 9] Odessa National Polytechnic University, Ukraine.
- [Agreement 10] Technical University of Sofia, Bulgaria.
- [Agreement 11] University of Calabria, Italy.
- [Agreement 12] Tsinghua University, China.
- [Agreement 13] University of Maine, USA.
- [Agreement 14] University of New Hampshire, USA
- [Agreement 15] University of South Carolina, USA.
- [Agreement 16] Physics-Mechanics Institute of G. Karpenko, National Academy of Sciences of Ukraine, Lviv, Ukraine.
- [Agreement 17] University of Siegen, Germany
- [Agreement 18] Chernivtsi National University by Yu.Fedkovich, Chernivtsi, Ukraine
- [Agreement 19] Wuhan University of Technologies, Wuhan, Hubei, China
- [Agreement 20] Kaunas University of Technology, Lithuania
- [Agreement 21] Hochschule für Technik und Wirtschaft Berlin, University of Applied Sciences, Germany
- [Agreement 22] Fachhochschule Dortmund, University of Applied Sciences, Germany
- [Agreement 23] Pre-Carpathian National University by Vasyl Stefanyk, Ivano-Frankivsk, Ukraine
- [Agreement 24] Silesian Technical University, Poland.
- [Agreement 25] Warsaw University of Technology, Poland
- [Agreement 26] National University of State Tax Service of Ukraine, Irpin, Kiev region.
- [Agreement 27] National University of Water and Environmental Engineering, Rivne, Ukraine.
- [Agreement 28] Kiev National University of Construction and Architecture, Ukraine.
- [Agreement 29] Lviv State University of Life Safety, Lviv, Ukraine
- [Agreement 30] Ivan Franko National University of Lviv, Lviv, Ukraine

Defended Master Theses

- [DefMas 1] Oleksandr Bondar, Designing software to control data acquisition unit ADuC-845 using LabVIEW, Ph.D., associate professor, V.V. Kochan
- [DefMas 2] Vitaliy Vygnanets, Neural Network Methods of Protection of the Internet of Things Technology, Ph.D., M. P. Komar
- [DefMas 3] Yury Zubal, Algorithm of user interaction with augmented reality learning material, Ph.D., associate professor, I. V. Turchenko
- [DefMas 4] Oleg Kachmar, Data Migration System between Different Help Desk Platforms, Ph.D., Associate Professor, N. G. Yatskiv

- [DefMas 5] Ivan Kit, Methods of Interaction Between User and IoT Based on Augmented Reality, Doctor of Technical Sciences, Professor, A. O. Sachenko
- [DefMas 6] Roman Komarnytsky, Plant Disease Recognition Based on Deep Neural Networks, Ph.D., M. P. Komar
- [DefMas 7] Roman Madarash, The Algorithm for Quadcopter Control Using Voice Commands, Ph.D., Associate Professor, N. G. Yatskiv
- [DefMas 8] Nazar Melnyk, Intelligent virtual assistant for a neural network entrant, H. V. Lipianina-Honcharenko
- [DefMas 9] Dmytro Nesplyak, Neural Network Algorithms for Semantic Information Coding, Ph.D., M. P. Komar
- [DefMas 10] Rostyslav Pereviznyk, Prediction of the Results of Sports Events Based on Neural Network Technologies, Ph.D., M. P. Komar
- [DefMas 11] Bohdan Sadovy, The Distributed Data Storage System Based on Cloud Services, Ph.D., Associate Professor, N. G. Yatskiv
- [DefMas 12] Andrii Turchenko, Classification of ECG signals using deep neural networks, Ph.D., associate professor, V.V. Kochan
- [DefMas 13] Anna KHOMYN, The Method for Knowledge Base Formation of Enrollee Intelligent Virtual Assistant, Ph.D., P. E. Bykovy
- [DefMas 14] Petro Tchaikivsky, Mobile robot control algorithms, Ph.D., associate professor, V. S. Koval
- [DefMas 15] Tadei Chervonyak, Improving the Efficiency of Training Deep Neural Networks Based on Nvidia Cuda Technology, Ph.D., M. P. Komar
- [DefMas 16] Dmytro Gatenyuk, Methods of analyzing network traffic parameters based on Big Data technology, Ph.D., M. P. Komar

Internship of Staff, PhD Students and Students

Staff Internship

- [Internship 1] Pavlo Bykovyy, associate professor of the Department of Information and Computing Systems and Management, Web Design Studio "Artes", September-October 2020.
- [Internship 2] Gryhoriy Hladii, associate professor of the Department of Information and Computing Systems and Management, PE "MAGNETIKVAN", September-October 2020.
- [Internship 3] Andriy Karachka, associate professor of the Department of Information and Computing Systems and Management, Svitlocentr LLC, September-October 2020.

Student Internship

- [Internship 4] Roman Komarnytskyi, FOP Pyrig F.E. / Wise Solutions, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 5] Roman Madarash, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 6] Nazar Melnyk, AVIDI TECHNOLOGIES LIMITED, Ternopil, Ph.D., associate professor, N. G. Yatskiv
- [Internship 7] Oleksandr Bondar, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 8] Vitaliy Vygnanets, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 9] Yuriy Zubal, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, candidate of technical sciences, associate professor, N. G. Yatskiv
- [Internship 10] Oleg Kachmar, Relokia LLC, Ternopil, Ph.D., associate professor, N. G. Yatskiv
- [Internship 11] Ivan Kit, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, candidate of technical sciences, associate professor, N. G. Yatskiv
- [Internship 12] Dmytro Nesplyak, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 13] Rostyslav Pereviznyk, PE "Aity-Sfera", Lviv, Ph.D., associate professor, N. G. Yatskiv
- [Internship 14] Bohdan Sadovy, Research Institute of Intelligent Computer Systems TNEU, Ternopil, candidate of technical sciences, associate professor, N. G. Yatskiv
- [Internship 15] Andriy Turchenko, Nuralogix Corporation, Toronto, Canada, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 16] Hanna Khomin, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 17] Petro Chaykivskyi, FOP Shevchenko O.I., Ternopil, Ph.D., associate professor, N. G. Yatskiv
- [Internship 18] Tadei Chervonyak, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Ph.D., Associate Professor, N. G. Yatskiv
- [Internship 19] Valentyn Domanskyi, "Vice Engineering" LLC, Ternopil, Doctor of Economics, Associate Professor, H.M. Gladiy
- [Internship 20] Dmytro Lendyuk, Communal Institution of the Ternopil Regional Council, Doctor of Economic Sciences, Associate Professor, H.M. Gladiy
- [Internship 21] Tymofiy Gadevych, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Doctor of Economics, Associate Professor, H. M. Gladiy

- [Internship 22] Oleg Dulishkovich, Kromtech Alliance Corp, Ternopil, Doctor of Economics, Associate Professor, H.M. Gladiy
- [Internship 23] Volodymyr Zhabyuk, Kromtech Alliance Corp, Ternopil, Candidate of Economic Sciences, Associate Professor, H.M. Gladiy
- [Internship 24] Maryan Lylyk, Research Institute of Intelligent Computer Systems of TNEU, Ternopil, Doctor of Economics, Associate Professor, H.M. Gladiy
- [Internship 25] Valentyna Makhnitska, Comfort Trend LLC, Lviv, Candidate of Economic Sciences, Associate Professor, H. M. Gladiy
- [Internship 26] Ihor Oprysak, Comfort Trend LLC, Lviv, Candidate of Economic Sciences, Associate Professor, H. M. Gladiy
- [Internship 27] Ivan Pashchuk, FOP Stepanenko A.V., Ternopil, candidate of economic sciences, associate professor, H. M. Gladiy
- [Internship 28] Roman Skrypets, "Vebitel" LLC, Lviv, Candidate of Economic Sciences, Associate Professor, H. M. Gladiy
- [Internship 29] Tatyana Furcha, FOP Pirig F.E. / Wise Solutions, Ternopil, Doctor of Economics, Associate Professor, G. M. Gladiy
- [Internship 30] Vitaly Chorpita, Comfort Trend LLC, Lviv, Candidate of Economic Sciences, Associate Professor, H. M. Gladiy

Research Visits

ICS' staff visits

[Visit 19] Anatoliy Sachenko, Pavlo Bykovyy visited the Cracov University of Technology, (Cracov, Poland) February 2020, to discuss the organizational issues of the 11th IEEE International Conference on Intelligent Data Acquisition Systems and Modern Computer Systems: Development and Application (IDAACS'2021).

[Visit 20] Anatoliy Sachenko attended conference E-TEMS'2020 (Dortmund, Germany), February-March 2020.

8. AWARDS

[Award 1]. Oleg Bandrivskiy and Bohdana Bilavych were awarded a 1st degree diploma at the All-Ukrainian competition of student scientific works in the specialty "Information systems and technologies", which took place on May 26, 2020 at the base of Khmelnytskyi National University.

[Award 2]. Bohdan Bilavych and Gerhard Lutterod received a grant for a semester of study in the partner countries of the Republic of Poland during the spring semester of the 2020-2021 academic year

[Award 3]. Oleksandr Osolinsky and students Viktor Turchenko, Oleksandr Stepanik received a certificate certifying participation and approbation of the results at the international IEEE conference "Advanced Computer Information Technologies", ACIT'2020, gifts and monetary incentives for the implementation of their startups.

[Award 4]. Khrystyna Lipyana-Honcharenko, Ivan Kit and third-year students took 1st and 2nd place at Open Data Campus Ternopil (online), which took place on June 21-27, 2020. The "Eagles" team with the project "Medical Portal of Ternopil won the Open Data Campus Ternopil (online). The "Phoenix" team deservedly took 2nd place with the tourist telegram bot "Ian Tarnovskyi".

9. STATISTICAL DATA
